

PRACTICAL ASSIGNMENT

Subject: MOBILE APP DEVELOPMENT II

Title: Development, Signing, and Deployment of a Flutter Mobile Application on Indus App Store

Guidelines:

- Application must contain Students Details.
 - Project must be pushed with only student's personal account.
 - Practical questions must be hand written.
 - Student have to submit pdf of practical questions at the end indusappstore link of mobile application.
-

Student Details

- Name: _____
 - University Roll Number: _____
 - Class Roll Number: _____
 - Section: _____
 - Department / Year: _____
 - University Name: _____
 - GitHub Project Link: _____
-

1. Aim

To develop a mobile application using Flutter, generate a signed APK/AAB file, and upload it to the Indus App Store.

2. Objectives

- To understand Flutter framework and Dart programming
 - To design and develop a functional mobile application
 - To learn the process of app signing
 - To deploy the application on the Indus App Store
 - Application must contain student details given above.
-

3. Requirements

Software:

- Flutter SDK
- Android Studio / VS Code
- Android SDK

Hardware:

- Computer/Laptop
- Android Device / Emulator

Result

The Flutter application was successfully developed, signed, and prepared for deployment on the Indus App Store.

Conclusion

This assignment helped in understanding the complete lifecycle of Flutter app development, including UI design, coding, testing, signing, and deployment.
