

Representation of Negative Numbers in Binary: (2's complement)

Number = +6

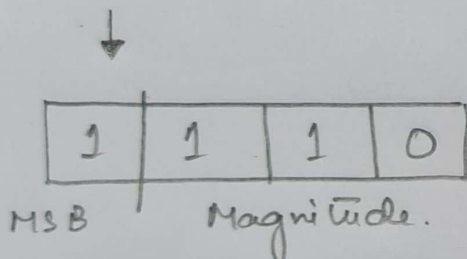

As it is a positive number, there will be no changes in magnitude.

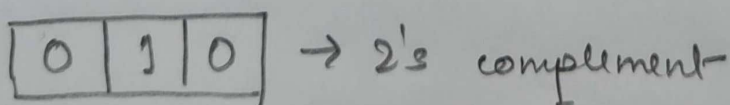

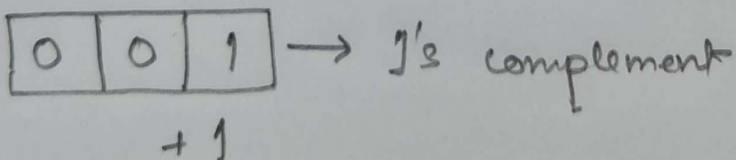

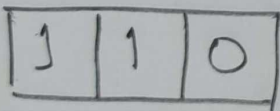

∴ Binary representation of +6 =

0	1	1	0
---	---	---	---

Number = -6

As it is a negative number, we will take 2's complement of its magnitude.

∴ Binary representation of -6 =

1	0	1	0
---	---	---	---
