

Essentials of Digital Marketing

Module III

Mobile Marketing
Marketing Analytics & ROI

Syllabus

3. Mobile Marketing

- Mobile landscapes for Marketing and Monetization,
- Conventional Advertising,
- Millennial Mobile Advertising,
- Versatile Promotions,
- Alternative focusing and promotions on Mobile,
- Push App and Game based promotions,
- Location evolution with mobile

3.2 Marketing Analytics & ROI

- Key marketing engagement & ROI metrics,
- Primer on data science and analytics concepts,
- Web Traffic nuances,
- Multi-channel Analytics,
- Decoding CLV and RFM,
- Deciphering conversion and goal metrics,
- Implement conjoint analysis & decision tree tactics,
- Avoiding common analytical pitfalls.

Essentials of Digital Marketing

Lecture -25

3.1 Mobile Marketing

Interesting Facts

- By 2019, mobile advertising is expected to represent 72% of all U.S. digital ad spending
- As of March 2017, 80% of top websites were mobile compatible
- 48% of consumers start any mobile informational journey via an organic search compared to
- 33% of consumers whose journey is attributed to direct traffic (i.e. indicative of deeper engagement)·
- Google drives 96% of mobile search traffic, followed by Yahoo at 2% and Bing at 1%·

- Gaming apps represent the largest percent of mobile usage, with a consumption of over 80%
- Web engagement is 70% higher on tablets than desktop & smartphones
- Mobile searches and app usage have increased 200% year over year in 2017 and have already surpassed desktop searches in 2015

3.1.1 Mobile Landscapes for Marketing and Monetization

- **Mobile Marketing:** is a multi-channel, digital marketing strategy aimed at reaching a target audience on their smartphones, tablets, and/or other mobile devices, via websites, email, SMS and MMS, social media, and apps.
- [80% of internet users](#) own a smartphone.

Mobile Purchase Decision Funnel

- Awareness:**

- This is where potential customers first become aware of a product or brand.
- In the mobile context, this could happen through social media ads, search results,
- video content on platforms like YouTube, or app store discovery.

- Consideration:**

- At this stage, potential customers are actively researching and comparing options.They might be reading reviews, watching product demos, or comparing features on mobile websites or apps.

Decision: This is the point where the customer decides to make a purchase. Factors influencing this decision include price, reviews, features, and overall user experience.

Action/Purchase: The customer completes the purchase through a mobile website or app.

Loyalty/Advocacy: After the purchase, the goal is to retain the customer and encourage them to become a loyal advocate for the brand.

Mobile Marketing Strategy

Case Study: Revitalizing a Local Restaurant's Takeout Business

Client: "The Spice Route," a popular but struggling local Indian restaurant in Agra, India, known for its authentic cuisine but facing declining takeout orders.

Challenge: The Spice Route's takeout business was dwindling despite its strong reputation for dine-in. They lacked a strong online presence and weren't leveraging mobile marketing to reach their tech-savvy customer base.

Goals:

- Increase takeout orders by 30% within three months.
- Enhance brand awareness and engagement among local mobile users.
- Establish a sustainable mobile marketing strategy.

Phase 1: Mobile-Optimized Foundation (Month 1)

- 1. Mobile-Friendly Website:** The existing website was not mobile-friendly, leading to a poor user experience on smartphones. A new, responsive website was developed, focusing on easy navigation, clear menu presentation, and a streamlined online ordering system.
- 2. Google My Business Optimization:** The Spice Route's Google My Business profile was optimized with accurate information, high-quality photos of food and the restaurant, and a "Order Now" button linking directly to the online ordering system.
- 3. Local SEO:** Targeted local keywords like "Indian food Agra," "best takeout Agra," and "Spice Route delivery" were integrated into the website content and Google My Business profile to improve search engine rankings.

Phase 2: Mobile Engagement & Promotion (Month 2)

1. **Mobile-First Social Media Campaign:** A Facebook and Instagram campaign was launched, featuring visually appealing food photos and videos, behind-the-scenes glimpses of the kitchen, and customer testimonials.
 - **Targeting:** Ads were targeted to users within a 5km radius of the restaurant, focusing on interests like "Indian cuisine," "food delivery," and "local restaurants."
 - **Content:** Short, engaging videos showcasing popular dishes and the ease of online ordering were created for mobile viewing.¹
2. **Interactive Elements:** Polls and quizzes about food preferences were used to boost engagement. SMS Marketing: A permission-based SMS campaign was initiated to announce weekly specials, discounts on online orders, and reminders about lunch/dinner deals.
3. **Partnerships with Food Delivery Apps:** The Spice Route partnered with popular food delivery apps like Zomato and Swiggy to expand their reach and offer convenient delivery options.

Phase 2: Mobile Engagement & Promotion (Month 2)

1. **Mobile-First Social Media Campaign:** A Facebook and Instagram campaign was launched, featuring visually appealing food photos and videos, behind-the-scenes glimpses of the kitchen, and customer testimonials.
 - **Targeting:** Ads were targeted to users within a 5km radius of the restaurant, focusing on interests like "Indian cuisine," "food delivery," and "local restaurants."
 - **Content:** Short, engaging videos showcasing popular dishes and the ease of online ordering were created for mobile viewing.¹
 - **Interactive Elements:** Polls and quizzes about food preferences were used to boost engagement.

Phase 3: Loyalty & Retention (Month 3)

- 1. Mobile Loyalty Program:** A digital loyalty program was implemented, rewarding customers with points for online orders, which could be redeemed for discounts or free items.
- 2. Push Notifications:** Customers who opted in received push notifications about new menu items, special offers, and upcoming events.
- 3. Customer Feedback & Reviews:** Customers were encouraged to leave reviews on Google and social media platforms, with the restaurant actively responding to feedback and addressing concerns.

Phase 3: Loyalty & Retention (Month 3)

Results:

- **Takeout Orders:** Increased by 45% within three months, exceeding the initial goal.
- **Website Traffic:** Mobile traffic to the website increased by 70%.
- **Social Media Engagement:** Facebook and Instagram engagement rates rose by 150%.
- **Customer Reviews:** Positive reviews increased by 60%, improving the restaurant's online reputation.

Phase 3: Loyalty & Retention (Month 3)

Key Takeaways:

- **Mobile-First Approach:** A mobile-friendly website and targeted mobile marketing campaigns are crucial for reaching today's consumers.
- **Visual Content:** High-quality photos and videos are essential for capturing attention and showcasing food effectively.
- **Local Targeting:** Focusing on local customers through targeted ads and local SEO is vital for restaurants.
- **Engagement & Interaction:** Engaging with customers through social media and interactive content builds relationships and fosters loyalty.
- **Convenience & Accessibility:** Offering online ordering, delivery through apps, and a mobile loyalty program enhances customer experience.²

3.1.2 Conventional Advertising

- One of the key differences between traditional marketing and mobile marketing is that traditional marketing has historically been used primarily for creating a brand preference and driving demand.
- Mobile, on the other hand, takes it up a notch to facilitate **ease of transactions** in addition to the above factors.
- A mobile consumer has a larger tendency to convert than a non-mobile consumer.

- **SMS and MMS Marketing Is Conventional**
- This can be unearthed from the fact that email open rates on mobile channels are about 60% on average however a text message is read almost 90% of the time.
- Thereby, it is essential to take adequate advantage of the opportunities provided by this channel, to increase audience engagement in SMS campaigns.

- Note that it is neither ethical nor legal to send unwanted messages with SMS marketing.
- SMS and MMS are influential channels for mobile marketing.
- About 4 billion people are able to receive SMS messages, and 90% of those messages are opened within three minutes.
- Consider the following:
 - The open rate of SMS is 95% as compared to 22% for emails.
 - There is an observed lift of 50% in sales conversion when a user is sent a marketing SMS.
 - Text messages can be 8x more effective at engaging customers as compared to other channels.

- SMS/MMS is highly personal as compared to other marketing channels, so thereby it is key to ensure that our messaging is always thoughtful and non-intrusive.
- Best Practices for SMS
 - Text limit should be of 140-160 characters.
 - Avoid using jargons.
 - Make the message valuable.
 - Include sender profile
 - Include a clear call-to-action.

- MMS is an advanced version of SMS marketing, where-in messages can be sent peer-to-peer, a mobile messaging service provider or a website to any mobile phone.
- MMS messages can include text, photos, videos, audios, GIFs etc.

Why should MMS be preferred over SMS?

- Increases campaign opt-ins by 20% over SMS.
- MMS texts have a higher customer engagement with a 15% average CTR (i.e. clickthrough rate).
- It is likely to be shared on social platforms.
- It is advantageous to explore the additional media options that comes with leveraging MMS messaging:
 - Include product-oriented visuals
 - Link the MMS to other marketing channels/campaigns
 - Provide CTA for social sharing

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

Topic: Declining Effectiveness of Conventional Advertising

Subject: Local Eats Diner, a family-owned restaurant in Bharthia, Uttar Pradesh, India.

Background:

Local Eats Diner has been a beloved institution in Bharthia for over 25 years, known for its authentic regional cuisine and warm, welcoming atmosphere. Traditionally, the diner has relied heavily on conventional advertising methods to attract customers, including:

- **Local Newspaper Ads:** Running weekly ads in the regional newspaper.
- **Radio Spots:** Airing short commercials on the local radio station during peak listening hours.
- **Flyers & Posters:** Distributing flyers in nearby residential areas and displaying posters at community centers.
- **Signage:** Maintaining a large, eye-catching signboard outside the diner

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

For many years, this approach was successful in drawing a steady stream of customers. However, in recent times, the diner has observed a noticeable decline in foot traffic and revenue, despite maintaining its advertising budget.

Problem Statement:

Local Eats Diner is facing a challenge in maintaining its customer base due to the declining effectiveness of its conventional advertising strategies in a rapidly changing media landscape.

Symptoms:

Decreased Foot Traffic: Fewer customers visiting the diner, especially during weekdays.

Falling Revenue: A noticeable drop in sales despite consistent advertising spending.

Reduced Ad Response: Fewer customers mentioning the newspaper ads, radio spots, or flyers when asked how they heard about the diner.

Younger Audience Disconnect: Difficulty attracting younger demographics who seem less responsive to traditional media.

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

•Analysis:

- Several factors are contributing to the declining effectiveness of conventional advertising for

- **Local Eats Diner:**

- Shifting Media Consumption Habits:** People, especially younger generations, are increasingly consuming media online and on mobile devices. Traditional media like newspapers and radio are losing their reach.

- **Increased Competition:** The rise of online food delivery platforms and the entry of new restaurants with strong digital marketing strategies are intensifying competition.

- Lack of Targeted Messaging:** Conventional advertising often uses a "one-size-fits-all" approach, failing to resonate with specific customer segments.

- **Limited Engagement & Interaction:** Traditional media offers limited opportunities for interaction and engagement with potential customers.

- Difficulty in Measuring ROI:** It's challenging to accurately track the return on investment for conventional advertising methods.

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

•Solution:

•To address these challenges, Local Eats Diner needs to adopt a more integrated and digitally-focused marketing strategy.

•Here's a proposed solution:

•1. Embrace Digital Marketing: Develop a User-Friendly Website:

Create a website with online ordering, menu, photos, and customer reviews.

•2 Establish a Social Media Presence: Engage with customers on platforms like Facebook, Instagram, and potentially a local food blog. Share high-quality photos, run contests, and respond to comments.

•Explore Online Advertising: Utilize targeted ads on social media and search engines to reach specific demographics and interests.

•Partner with Food Delivery Platforms: List the diner on popular food delivery apps to expand reach and convenience.

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

2. Enhance Customer Engagement:

- **Implement a Loyalty Program:** Reward repeat customers with discounts and special offers.
 - **Encourage Online Reviews:** Prompt satisfied customers to leave reviews on Google, Yelp, and other platforms.
 - **Host Events & Promotions:** Organize themed nights, live music, or cooking demonstrations to attract customers and create buzz.
-
- **3. Optimize Conventional Advertising:**
 - **Refine Messaging:** Tailor ads to specific customer segments and highlight unique selling points
 - **.Integrate with Digital Efforts:** Include website addresses and social media handles in print and radio ads.
 - **Track Ad Performance:** Implement methods to measure the effectiveness of conventional advertising, such as offering coupons with unique codes.

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

4. Train Staff on Customer Service:

- **Emphasize Online Reputation Management:** Educate staff on the importance of responding to online reviews and comments.
- **Encourage Friendly & Personalized Service:** Train staff to create a welcoming and memorable dining experience.

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

Implementation Plan:

- **Phase 1 (Month 1-3):** Develop a website, establish social media presence, and train staff on customer service.
- **Phase 2 (Month 4-6):** Launch online advertising campaigns, partner with food delivery platforms, and introduce a loyalty program.
- **Phase 3 (Month 7-12):** Continuously monitor and optimize marketing efforts, track ROI, and explore new digital marketing trends.

Case Study: Declining Effectiveness of Conventional Advertising for "Local Eats Diner"

Expected Outcomes:

- **Increased Foot Traffic & Revenue:** Attract new customers and boost sales through a targeted and engaging marketing approach.
- **Improved Brand Awareness:** Enhance the diner's online presence and reach a wider audience.
- **Enhanced Customer Loyalty:** Build stronger relationships with customers through personalized service and loyalty programs.
- **Measurable ROI:** Track the effectiveness of marketing efforts and optimize spending for maximum impact.
- **Conclusion:** By embracing digital marketing, enhancing customer engagement, and strategically optimizing its conventional advertising efforts, Local Eats Diner can overcome the challenges of a changing media landscape and ensure its continued success in the Bharthia community. This case study demonstrates the importance of adapting to evolving consumer behaviors and adopting a holistic marketing approach to thrive in today's competitive market. Sources and related content

Regulatory Compliance

- Since these messages are considered as automated sends, it is of paramount importance to consider privacy regulations while plan SMS and MMS campaigns.
- Below are the three privacy principles that should oversee the implementation of SMS and MMS marketing:
 1. **Adequate notice**— customers should be informed that they will be receiving SMS messages from a concrete shortcode based program.
 2. **Opt-in consent**— getting explicit opt-in confirmation from users before sending any marketing SMS and MMS messages.
 3. **Opting out**— It should be very clear how someone can opt out of the program.

Conventional Mobile Advertising Strategy

Step 1 - Create Mobile Buyer Personas:

- Creating and implementing buyer personas are valuable mechanisms to deduce target audience.
- Deciphering a target audience is the key to any marketing strategy.
- They can be construed primarily as fictional depictions of the various customer profiles.
- The key attributes to consider while designing a buyer persona (apart from personal details) are as follows:
 - Background
 - Job description
 - Source of information
 - Goals
 - Challenges
 - Preferred content

- It is essential to collect mobile behavioral data of the audience and try to gather valuable actionable insights and usage patterns.
- Some interesting observations include:
 - Over 60% of all emails is first opened on a mobile device.
 - Around 48% of users start their mobile internet sessions via a search engine.
 - Nearly 95% of adults primarily use their smartphones to access content/information.

Step 2 - Set Goals

- Determining the key performance indicators and success criteria are key for defining any effective marketing strategy.
- Thus, it is very important to consider views of all stakeholders to map these elements.
- The following activities can help us to achieve these objectives:
 - Defining time-lines to ensure everyone is on the same page
 - Describing the reasons and expectations for considering mobile marketing
 - Evaluation of all the previous marketing initiatives and their associated performances to showcase the reaped benefits

Step 3 - Establish KPIs (Key Performance Indicators)

- It is essential to lay out the key performance indicators that are realistic.
- The successful outcomes should depend on measurable campaign criteria.
- The following factors should be considered for defining the KPI landscape:
 - Conversion rate
 - Cost per acquisition
 - Retention rate
 - Churn rate
 - Daily active users (DAU)
 - Monthly active users (MAU)
 - Return on investment

Step 4 - Monitor Performance Metrics

- Performance analytics determine the key success factors of any marketing campaign which stands true for mobile campaigns as well.
- Thereby to ensure success of any campaign, it is essential to measure the associated KPIs against the set goals, understand relevant trends and behaviors and convert them into actionable insights wherever applicable.

Digital Marketing & Transformation (BCAE0005)

Lecture -26

3.1.3 Millennial Mobile Advertising

- Millennials are the generation that truly grew up during the tech evolution, stretching back from the days of dial-up internet access to the current smartphone friendly generation.
- Newsweek magazine reported that the Millennial generation was born between 1977 and 1994.
- They are true digital natives and are considered to be a tech-savvy and a hyper-connected group that we all know today.
- https://youtu.be/1-t4_TmmxEw?si=LyGraYGGJQaRkXrR

- As per ComScore, below are some facts which we should consider while strategizing mobile marketing for millennials.
 - Millennials hate push notifications, but have only themselves to blame as they are usually not mindful of basic app permissions.
 - Millennials don't mind shelling out money for apps.
 - Millennials will delete an app if its logo is unappealing.

- A mobile-friendly website is no longer an option—it's a must.
- The rise in mobile traffic coupled with Google's mobile-friendliness ranking factor.
- For search engines, “mobile-friendliness” suggest to the following:
 - Content fits on the screen without side-to-side scrolling or zooming.
 - Optimum page load times
 - Website returns no mobile-specific errors.

- The most important reason to maintain a mobile-friendly site is to create a consistent and engaging user experience.
- Mobile UX always has a dramatic effect on every stage of the buying cycle:
 - 64% of mobile web users discard pages if they don't load within 10 seconds.
 - 35% of executives could not make an intended purchase because the website they visited wasn't mobile-friendly.
 - 90% of the executives use mobile devices to research potential business procurement.

- Key considerations for designing email CTAs for mobile users:
 - Use responsive design—a methodology that automatically formats web page content for optimal viewing on any device
 - Ensure CTA visibility (possibly at the top).
 - Ensure optimal sizing of the CTA button, so they are easily “tap-able.”

Case Study: Millennial Mobile Advertising & Versatile Promotions

Scenario:

Imagine a small to medium-sized enterprise (SME) in the retail sector, specifically a trendy clothing boutique targeting millennials.

They've identified mobile advertising as a key strategy but are struggling to effectively engage their target audience with versatile promotions.

Challenges:

1. Millennial Engagement: Millennials are a diverse and digitally savvy group. Traditional advertising often fails to capture their attention.

2. Mobile Optimization: Creating mobile-friendly ads that are visually appealing and load quickly is crucial, but the SME lacks in-house expertise.

3. Promotion Versatility: Developing a range of promotions that cater to different millennial preferences (e.g., flash sales, personalized discounts, interactive content) is challenging.

4. Data Analysis & ROI: Tracking the effectiveness of mobile campaigns and demonstrating a clear return on investment (ROI) is difficult without robust analytics.

5. Budget Constraints: As an SME, they have limited resources for advertising, making it essential to maximize every dollar spent.

Analysis: :

1. Millennial Mobile Advertising:

This highlights the need for a mobile-first approach. Millennials spend a significant amount of time on their smartphones, making it a prime channel for reaching them.

Versatile Promotions: This indicates the importance of offering a variety of promotions to cater to the diverse preferences and purchasing behaviors of millennials. One-size-fits-all approaches are unlikely to be effective.

Solutions:

1.Targeted Mobile Advertising:

- Platform Selection:** Focus on platforms where millennials are most active (e.g., Instagram, TikTok, Snapchat, YouTube).
- Micro-Influencer Marketing:** Partner with relevant micro-influencers who have a strong following among the target audience.
- Location-Based Targeting:** Utilize geo-targeting to reach millennials in specific locations (e.g., near their physical store or in popular hangout spots).
- Personalized Ads:** Leverage data to create personalized ads based on user interests and behaviors.

2.Mobile Optimization:

- Mobile-First Design:** Ensure all ads and landing pages are optimized for mobile devices with fast loading times and responsive design.
- Short-Form Video Content:** Create engaging short-form video ads that are optimized for mobile viewing.
- Interactive Elements:** Incorporate interactive elements like polls, quizzes, and AR filters to increase engagement.

Promotion Versatility:

- **Flash Sales & Limited-Time Offers:** Create a sense of urgency with flash sales and limited-time offers.
- **Personalized Discounts:** Offer personalized discounts based on purchase history or loyalty program participation.
- **Interactive Contests & Giveaways:** Run contests and giveaways on social media to generate excitement and engagement.
- **User-Generated Content (UGC) Campaigns:** Encourage customers to share photos and videos of themselves using the product for a chance to win prizes.

Data Analysis & ROI:

- **Track Key Metrics:** Monitor key metrics like click-through rates (CTR), conversion rates, and cost per acquisition (CPA).
- **A/B Testing:** Conduct A/B testing to optimize ad creatives and targeting strategies.
- **Attribution Modeling:** Use attribution modeling to understand the customer journey and identify the most effective touchpoints.
- **ROI Calculation:** Calculate the ROI of each campaign to demonstrate the effectiveness of mobile advertising efforts.

Budget-Friendly Strategies:

- **Focus on Organic Reach:** Leverage social media platforms for organic reach through engaging content and community building.
- **Cost-Effective Ad Formats:** Experiment with cost-effective ad formats like carousel ads and story ads.
- **Partnerships & Collaborations:** Collaborate with other businesses or organizations to cross-promote products and services.

Implementation:

- **Develop a Mobile Marketing Strategy:** Outline clear goals, target audience, budget, and key performance indicators (KPIs).
- **Create Engaging Content:** Develop high-quality, visually appealing content that resonates with the target audience.
- **Test and Optimize:** Continuously test and optimize campaigns based on performance data.
- **Build Relationships:** Foster relationships with influencers, customers, and other stakeholders.

Conclusion:

- By addressing the challenges of millennial engagement, mobile optimization, promotion versatility, data analysis, and budget constraints, the SME can develop a successful mobile advertising strategy that drives sales and builds brand loyalty. This case study highlights the importance of understanding the target audience, leveraging mobile platforms effectively, and offering a variety of engaging promotions to achieve marketing goals.

Digital Marketing & Transformation (BCAE0005)

Lecture -27

3.1.5 Alternative focusing and promotions on Mobile

1. QR codes:

- QR codes are scanned by users, who are then redirected to a specific webpage, embedded within the QR code.
- They are often aligned with mobile gamification principles and have an element of probabilistic chance to them, this appeals to inherent human psychological desires for attaining reward, self expression, achievement, competition, and status.
- <https://www.qrstuff.com/>

2. Mobile search and image ads

- These are basic Google search ads built for mobile, often featuring extra add-on extensions like click-to-call or maps.
- Image-based ads designed to appear on mobile devices.

3.1.6 Push App and Game based promotions

App-based Marketing

- Mobile apps can help in accomplishing various marketing goals like:
 - maximizing brand awareness for the product,
 - driving engagement,
 - and supporting online sales activities.

- It is also essential to ensure that the app encourages user engagement to build relationships and loyalty, and drives conversion.
- These conversions are driven by two types of messages:
 1. Push notifications.
 2. In-app notifications

Push Notifications

- Push notifications are an effective marketing tool for anyone with a mobile app because they help in engaging regularly with users.
- Push notifications look like SMS text messages and mobile alerts, but they only reach users who have installed the app.
- Each mobile platform has support for push notifications (i.e. iOS, Android, Fire OS, Windows and BlackBerry, with their own services).

- Push notifications provide convenience and value to app users.
- For example, users can receive:
 - Stock updates and news right on their lock screen
 - Utility messages like traffic and weather reports
 - Flight check in, change, and connection information

- Several platforms and services can help you create and manage push notifications. Some popular options include:
- **Firestore Cloud Messaging (FCM):** Google's cross-platform messaging solution.
- **OneSignal:** A popular platform for push notifications, in-app messaging, and more.
- **CleverTap:** A customer engagement and retention platform with robust push notification capabilities.
- **Adobe Experience Cloud:** provides tools for marketing and customer experience management, that include push notification capabilities.

- For app publishers, push notifications are a way to speak directly to a user.
- These messages usually don't get caught in spam filters or forgotten in an inbox — and furthermore have click-through rates which can be twice as high than an email.
- They can also be used to drive actions, such as:
 - Promoting products or offers to increase sales
 - Improving customer experience
 - Converting unknown app users to known customers
 - Driving users to other marketing channels, such as social networks

In-App Notifications

- In-app notifications are displayed while the user is active within the app itself – also referred to as native app content.
- The in-app messaging is highly appropriate.
- They are rooted in analytics and can be triggered based on user actions.
- Because of its personalized style, in-app messaging is better at delivering content, based on user context and expectations.
- In-app messaging should feel like a natural part of the app not additional marketing.

- Advantage of in-app notifications:
 - Introducing new app features to users.
 - Sending messages to promote engagement with specific content pieces.

Creating app

- <https://youtu.be/jeFcpWyskg8?si=gBB2oUeag7yEuZb>
[v](#)
- <https://youtu.be/w4nWzf3FS6g?si=ElkvedTZ28fDReJn>

Getting listed on app stores

- Sign-up with Google/Apple or release on own website
 - Installation required in APK/IPA format
 - For non-store apps, the allow untrusted sources configuration should be set on device
 - Quality check (Guidelines provided for each of them)
 - UI and usability
 - Functionality (it should work)
 - Size issues
 - https://youtu.be/vi5Ns2R4ImI?si=E_oAEVaB3KuTHXRD
 - <https://youtu.be/Ormjb-BX1sw?si=N5su2kEvhLq1-Fcp>

App Store optimization (ASO)

- Optimizing on Search Engines = Search Engine Optimization
- Optimizing to be found on App Store = App Store optimization
 - Keywords are different (update to show latest and changing user search queries)
 - Fetching Customer Reviews
 - Smart looking screenshots
 - Tying back with Google+

App Store Optimization (ASO) Guidelines

- Key points to focus on for ASO (App Store Optimization)
 - Keep the user in mind
 - App name should be unique
 - Description should contain typical usage of the app
 - Focus on relationships and not on transactions
 - Use customer feedback for improving the product

App Store Optimization (ASO) Guidelines

- Key points to focus on for ASO (App Store Optimization)
 - Keep the user in mind
 - App name should be unique
 - Description should contain typical usage of the app
 - Focus on relationships and not on transactions
 - Use customer feedback for improving the product

Case Study: Revitalizing a Struggling Fitness App Through ASO

Scenario:

"FitLife," a fitness tracking and workout app, launched six months ago with a promising concept and initial marketing push. However, the app has seen a significant decline in downloads and user engagement over the past few months. Despite having a solid product with good user reviews, FitLife is struggling to gain visibility in the crowded app stores.

Challenges:

- 1. Low Organic Visibility:** The app is buried in search results, making it difficult for potential users to discover it organically.
- 2. Declining Download Rates:** The initial surge in downloads has plateaued, and the app is not attracting new users.
- 3. High Uninstallation Rate:** While the app has positive reviews, there's a concerning rate of users uninstalling it shortly after downloading.
- 4. Ineffective App Store Listing:** The app's title, description, keywords, and screenshots are not optimized for search and conversion.
- 5. Limited Budget for Paid Advertising:** FitLife has a limited marketing budget and needs to rely on organic growth to succeed.

Analysis:

- **App Store Optimization (ASO):** The image highlights the core issue – the need for a comprehensive ASO strategy. ASO is crucial for improving organic visibility, driving downloads, and increasing user engagement.¹
- **Low Visibility Impact:** Low visibility directly translates to fewer downloads, hindering the app's growth and potential revenue.²
- **Uninstallation Rate:** This suggests a potential disconnect between the app's promise and its actual user experience or a lack of clear onboarding and engagement strategies.
- **Ineffective Listing:** A poorly optimized app store listing can deter potential users, even if the app itself is high-quality.³

Solutions:

1. Comprehensive Keyword Research:

- **Identify Relevant Keywords:** Conduct thorough keyword research using ASO tools to identify high-volume, low-competition keywords related to fitness, workouts, and tracking.
- **Long-Tail Keywords:** Target specific long-tail keywords to capture niche audiences.⁴
- **Competitor Analysis:** Analyze competitor keywords to identify opportunities and gaps.

2. Optimized App Title and Subtitle:

- **Include Primary Keywords:** Incorporate relevant keywords into the app title and subtitle to improve search ranking.
- **Highlight Key Features:** Showcase the app's unique selling propositions and key features in the subtitle.
- **Keep it Concise:** Use a clear and concise title that is easy to understand and remember.

Solutions:

Compelling App Description:

- **Keyword Integration:** Strategically integrate relevant keywords into the app description while maintaining readability.
- **Highlight Benefits:** Focus on the benefits of using the app and how it solves user problems.
- **Use Bullet Points and Formatting:** Break up the text with bullet points and formatting to make it easier to read.
- **Include Social Proof:** Highlight positive user reviews and testimonials.

High-Quality Visual Assets:

- **Eye-Catching App Icon:** Design a visually appealing app icon that stands out in search results.
- **Engaging Screenshots and Videos:** Create high-quality screenshots and videos that showcase the app's features and benefits.
- **Localize Visuals:** Localize visuals for different target markets to resonate with local users.

Solutions:

Boost Ratings and Reviews:

- **Encourage Users to Rate and Review:** Prompt users to rate and review the app within the app itself.
 - **Respond to Reviews:** Respond to user reviews, both positive and negative, to show that you value feedback.
 - **Address Negative Feedback:** Address negative feedback and resolve any issues to improve user satisfaction.
-
- **Analyze and Iterate:**
 - **Track Key Metrics:** Monitor key ASO metrics like keyword rankings, download rates, and conversion rates.
 - **A/B Testing:** Conduct A/B testing on different app store elements to identify what works best.
 - **Iterate and Optimize:** Continuously iterate and optimize the ASO strategy based on data and insights.

Implementation:

- **Develop an ASO Strategy Document:** Outline the goals, target audience, keyword strategy, and optimization plan.
- **Utilize ASO Tools:** Invest in ASO tools to conduct keyword research, track performance, and analyze competitors.
- **Regularly Update the App Listing:** Update the app listing with new keywords, screenshots, and descriptions as needed.
- **Monitor User Feedback:** Pay close attention to user reviews and feedback to identify areas for improvement.

Conclusion:

By implementing a comprehensive ASO strategy, FitLife can significantly improve its organic visibility, attract new users, and increase user engagement.

This case study demonstrates the importance of ASO in driving app growth and success in a competitive market. By focusing on keyword optimization, compelling visual assets, and continuous iteration, FitLife can revitalize its app and achieve its business goals.

3.1.7 Location Evolution with Mobile

Location-based marketing

- Ads that appear on mobile devices based upon a user's location relative to a specific area or business.
- For example, some advertisers may only want their mobile ads to appear when users are within a one-mile radius of their business establishment.

Best Practices for Mobile Marketing

- Consider making emails, ads and sites for mobile **mostly text based** to ensure **deliverability and readability** of the message.
- *Smaller blocks of text, shorter sentences = more seen, read, and understood in a shorter amount of time*
- Make sure the mobile apps or optimized sites have very **clear call to action prompts and are easy to use**
- The **fewer obstacles in sharing**, the happier the consumers will be
- **Optimize** the campaigns for **frequently misspelled search words**
