

ASSIGNMENT

SUBJECT : **DIGITAL MARKETING AND TRANSFORMATION**
SUB CODE: **BCAE0005**

- 1) Explain the concept of the marketing funnel and its stages (Awareness, Consideration, Decision).
- 2) What are the key metrics used to measure the success of a digital marketing campaign?
- 3) How can businesses conduct market research to understand their target audience?
- 4) What are buyer personas and how can they be used to create effective content?
- 5) How can businesses integrate different digital marketing channels (e.g., social media, email, SEO) into a cohesive strategy?
- 6) How can businesses track and measure the ROI of their integrated marketing efforts?
- 7) What are the key strategies for converting leads into paying customers?
- 8) Case Study: A travel blog struggles to gain traction despite high-quality content.
 - Question: How can SEO be applied as both an "art" (creative, intuitive) and a "science" (data-driven, methodical) to improve the blog's visibility and attract organic traffic?
- 9) Case Study: An e-commerce store has a large library of product images and videos.
 - Question: Explain how to optimize these digital assets (images, videos) and their metadata for search engines and user experience.
- 10) Case Study: A beauty brand wants to expand its reach through influencer marketing.

- Question: Outline the steps involved in identifying relevant influencers, building relationships, and executing a successful influencer marketing campaign.

11) Case Study: A clothing retailer sends out a single mass email to all subscribers.

- Question: Explain the benefits of segmenting the email list and provide examples of how to segment subscribers for more targeted campaigns.

12) Case Study: A company collects email addresses through website forms but has a low subscription rate.

- Question: Discuss the importance of permission marketing and explain how to obtain email addresses ethically and legally.

13) Case Study: An online course platform sends out emails with low open and click-through rates.

- Question: Explain how to improve email deliverability and system reputation to ensure emails reach the recipient's inbox.

14) Case Study: A travel agency sends out the same email to all subscribers, regardless of their travel preferences.

- Question: Explain the importance of personalization in email marketing and provide examples of how to personalize email content for individual subscribers.

15) Case Study: A company sends out promotional emails but receives high complaint rates.

- Question: Explain the difference between promotional, transactional, and newsletter emails, and discuss the best practices for each type in terms of content and frequency.

16) Case Study: A company sends out emails that are frequently marked as spam.

- Question: Explain the factors that contribute to emails being marked as spam and discuss best practices for avoiding spam filters and maintaining a good sender reputation.

17) Explain the concept of "Image Optimization" for SEO. How can you optimize an image for search engines?

18) Differentiate between "White Hat", "Black Hat", and "Grey Hat" SEO techniques with an example of each.

19) What is an "Email Service Provider" (ESP)? List 3 key factors to consider when choosing an ESP.

20) How can you effectively segment your email list? Explain 3 benefits of email list segmentation.

cess of your email marketing campaigns?
