

Non-Verbal Reasoning

Q1) Select a figure from the Answer Figures which will continue the same series as formed by five Problem Figures:

Problem Figures:

Answer Figures:

1)		
2)		
3)		
4)		
5)		
6)		

Q2) Determine how the pattern will appear when the transparent sheet is folded along the dotted line.

1)					
2)					
3)					
4)					
5)					
6)					

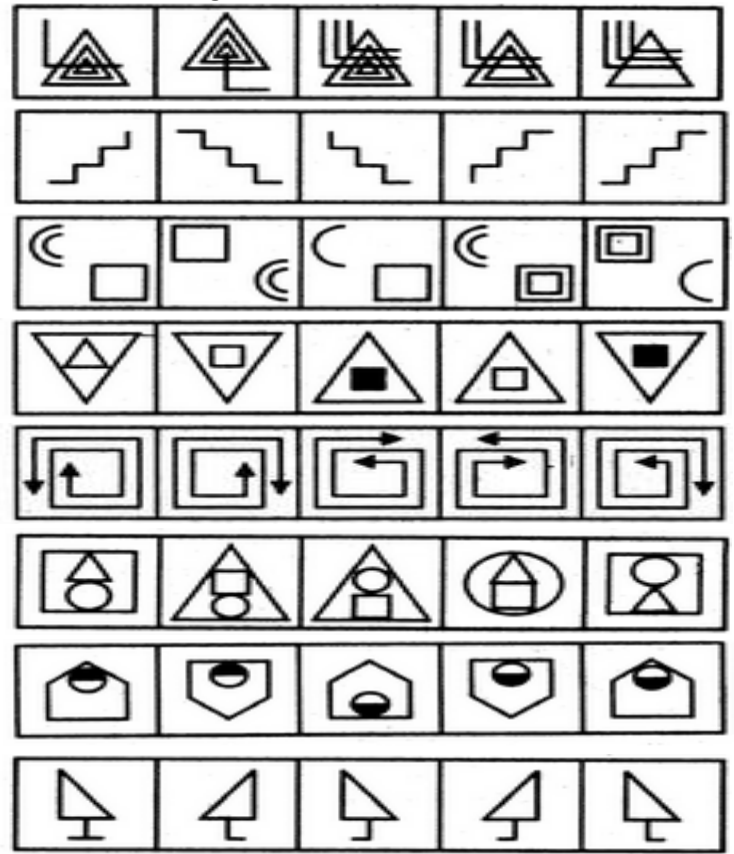

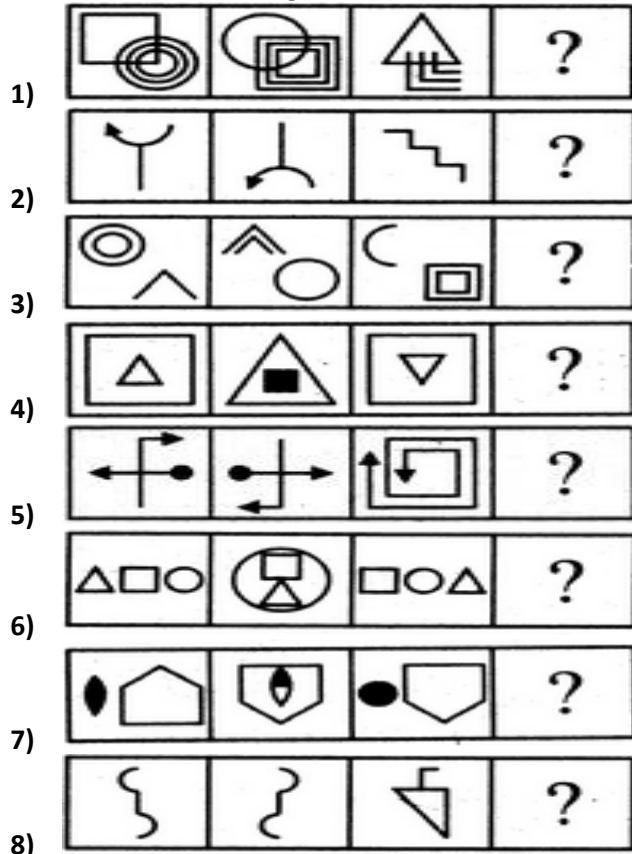

Q3) Choose the figure which is logically different from the remaining four figures given in the question:

1)		
2)		
3)		
4)		
5)		
6)		
7)		
8)		

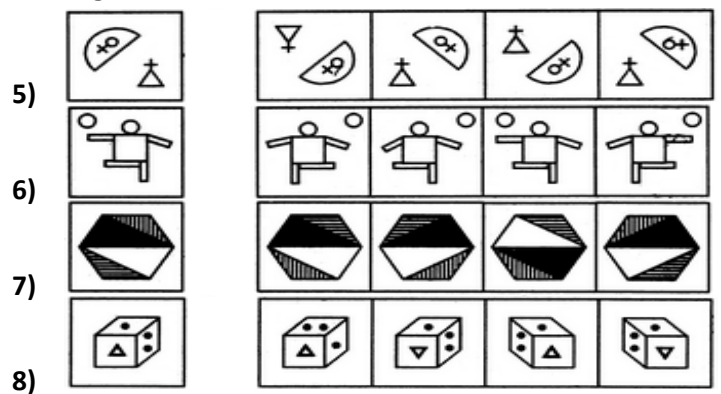

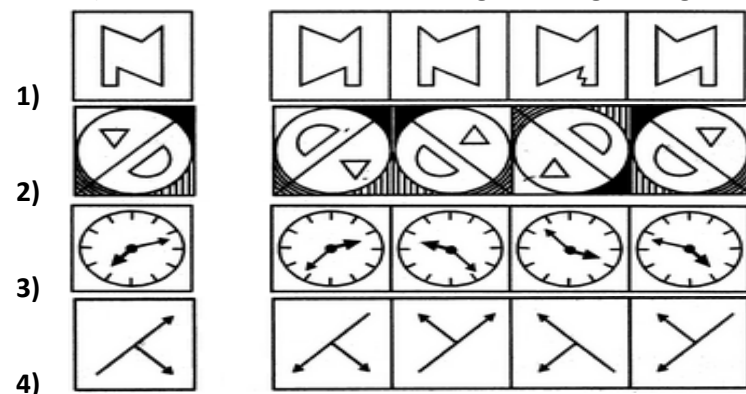

Q4) Select a suitable figure from the Answer Figures that would replace the question mark (?).

Problem Figures:

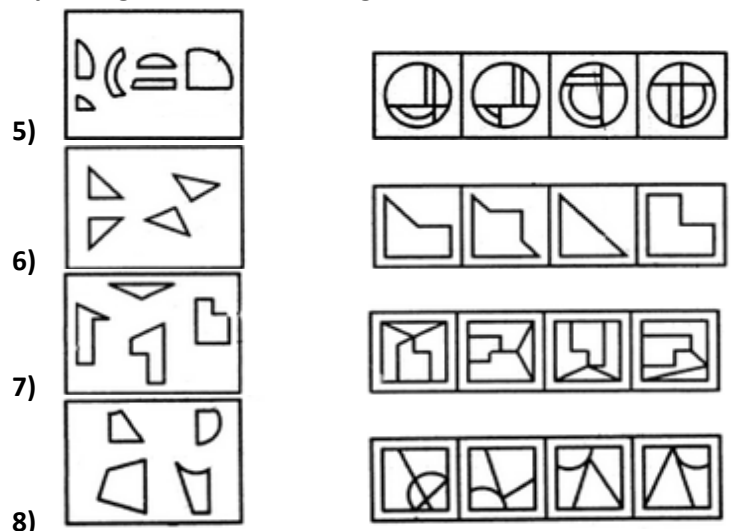

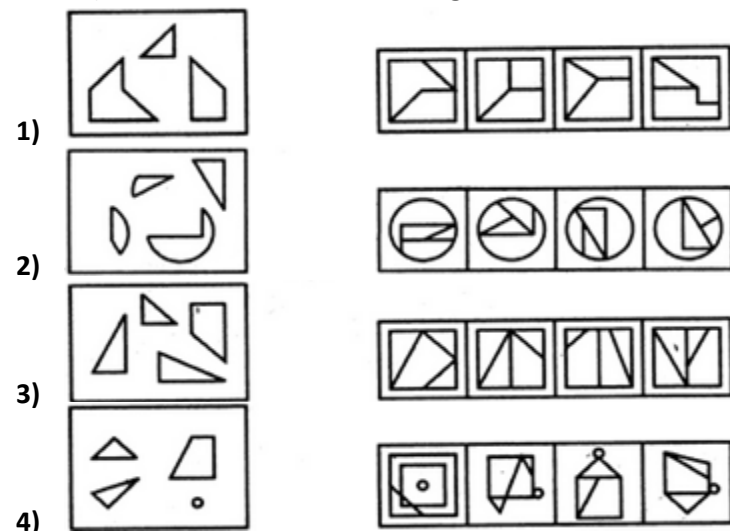

Answer Figures:

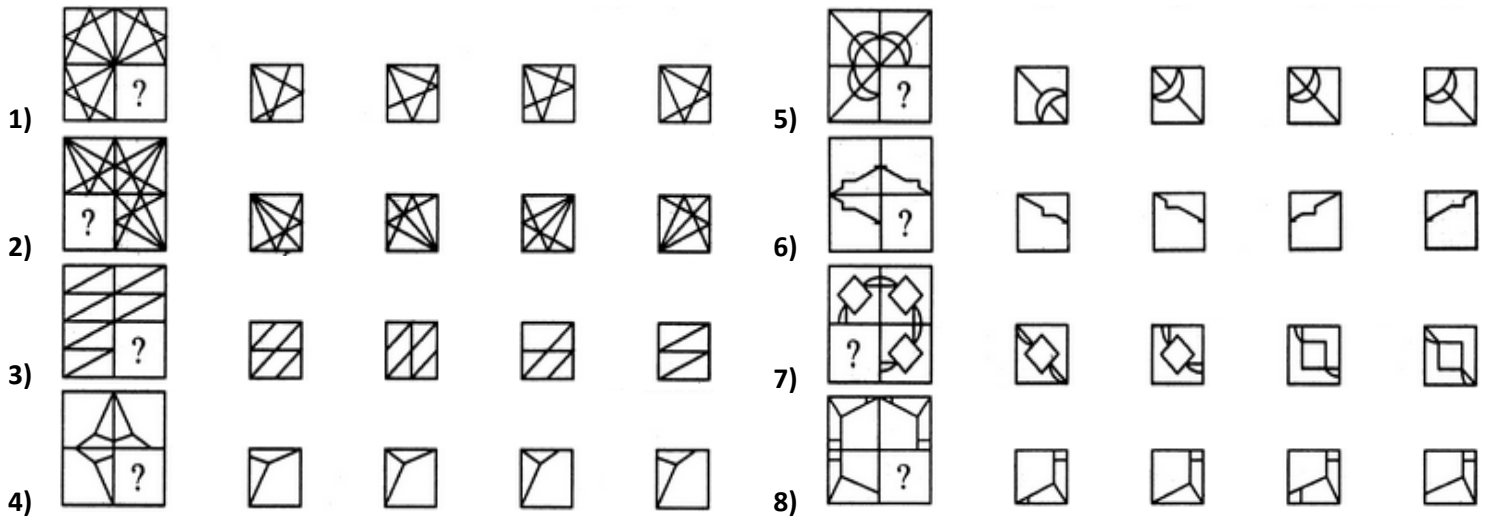

Q5) Choose the correct mirror image of the given figure from amongst the four alternatives:

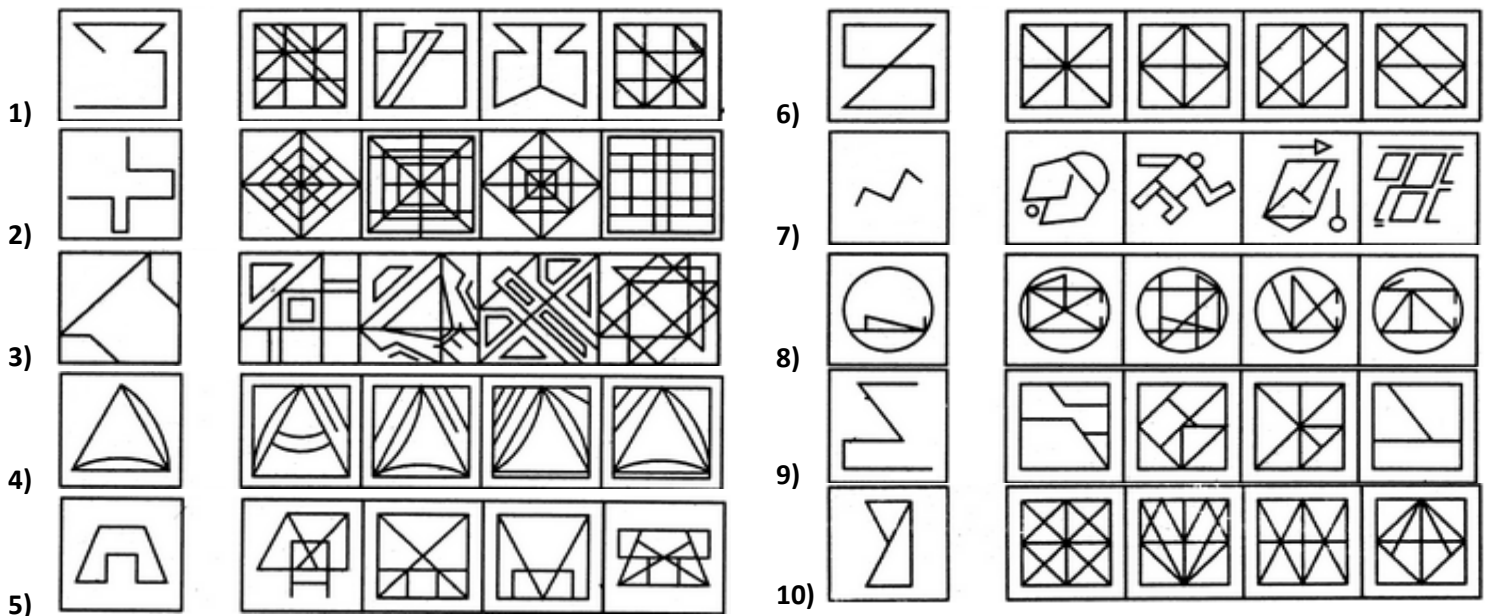

Q6) Find out which of the four figures can be formed from the pieces given in the initial figure.

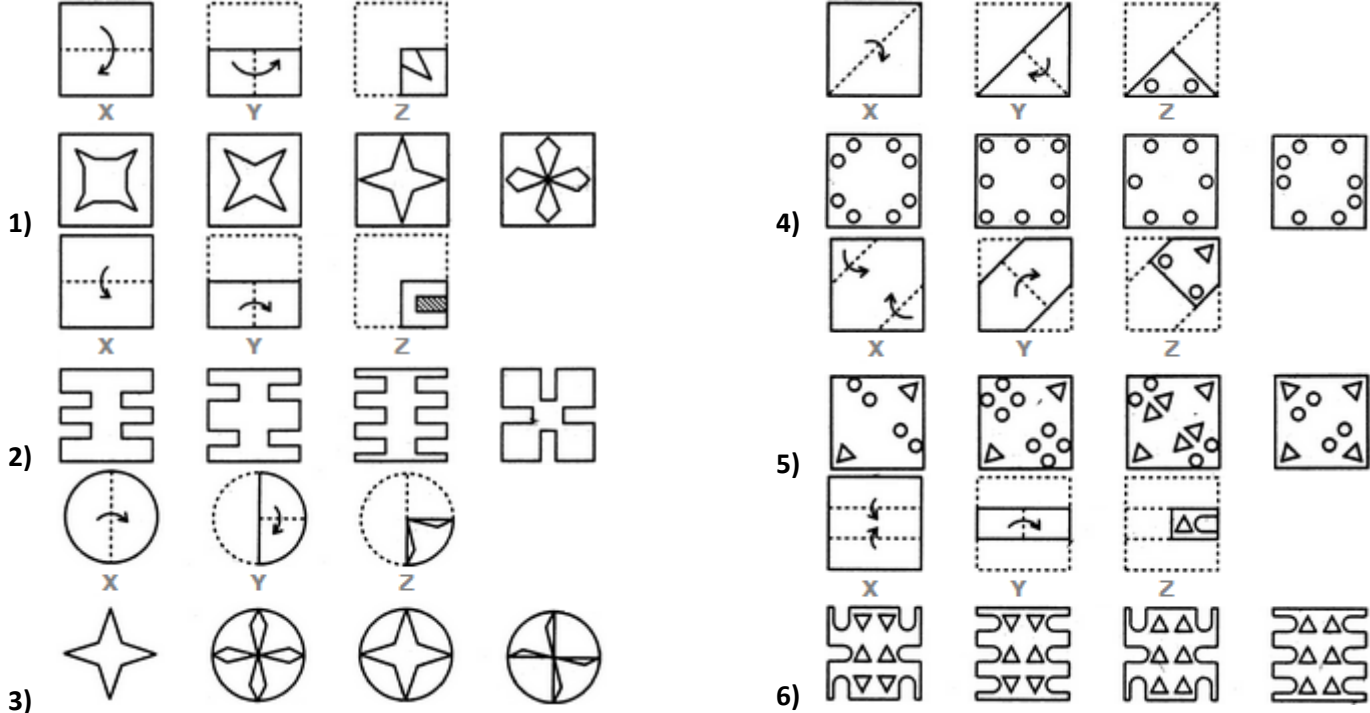

Q7) Identify the figure that completes the pattern.

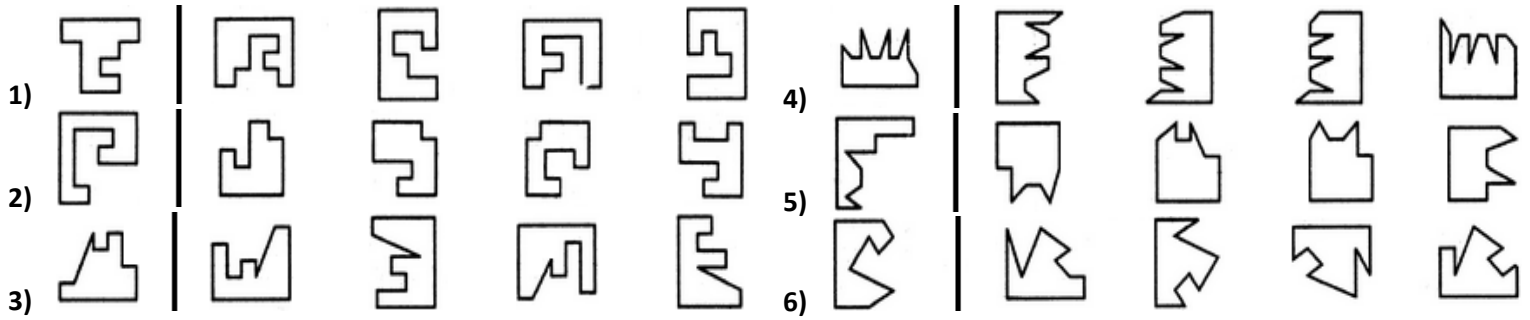

Q8) Find out the alternative figure which contains initial figure as its part.

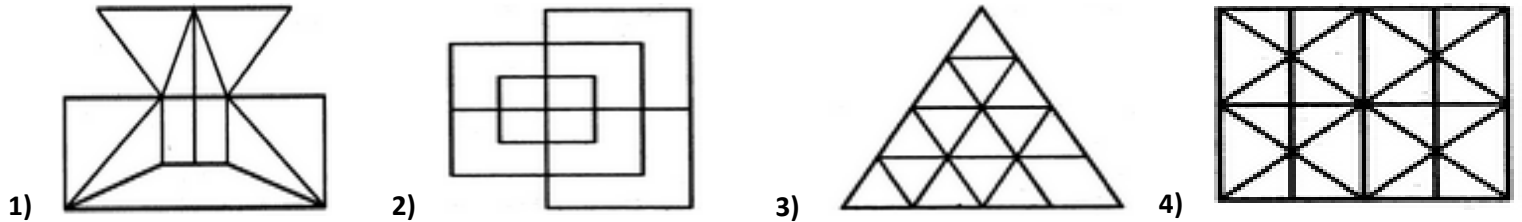

Q9) Choose a figure which would most closely resemble the unfolded form of figure (Z):

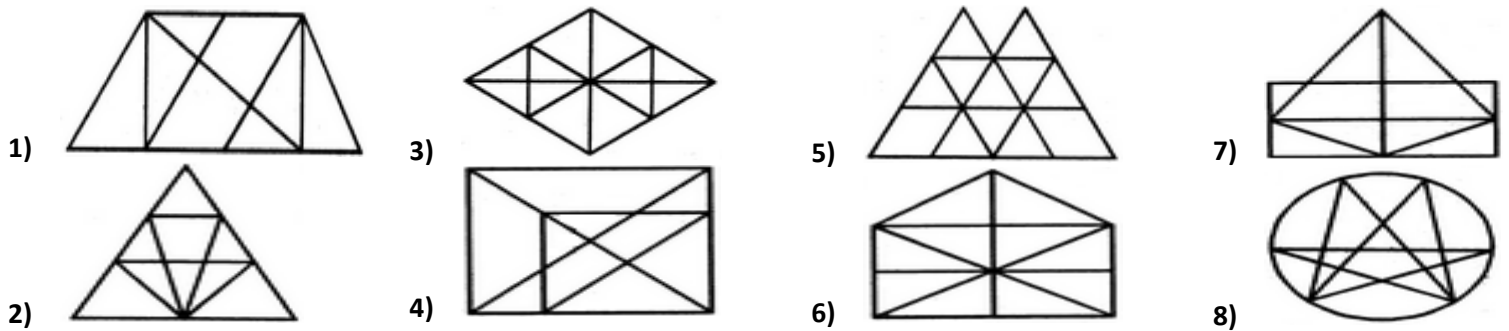

Q10) Select a figure from the given four alternatives which fits exactly into the initial figure to form a perfect square:

Q11) Find the minimum number of straight lines required to make the given figure.

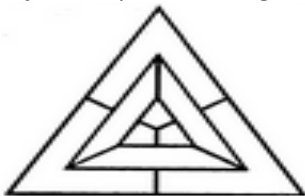

Q12) Count the number of triangles in the given figure.

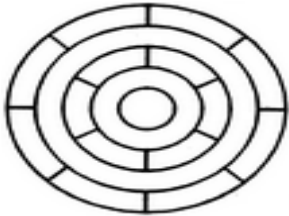

Additional Questions:

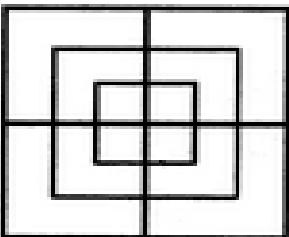

- 1) What is the minimum number of colours required to fill the spaces in the given diagram without any two adjacent spaces having the same colour?

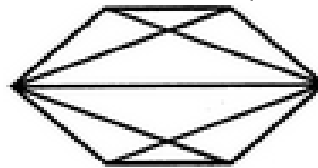

- 2) What is the minimum number of different colours required to paint the given figure such that no two adjacent regions have the same colour?

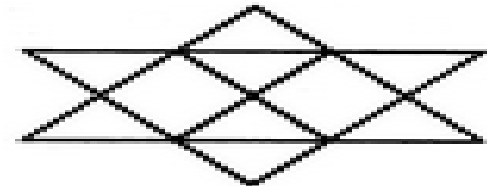

- 3) Count the number of squares in the given figure.

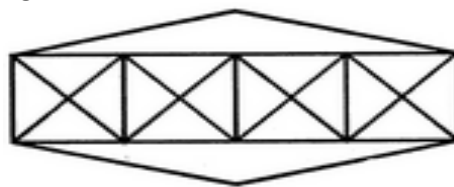

- 4) Find the number of quadrilaterals in the given figure.

- 5) Count the number of parallelogram in the given figure.

- 6) Count the number of triangles and squares in the given figure.

- 7) Determine the number of rectangles in the given figure.
