

BEDO0001: PHYSICAL EDUCATION & YOGA

Objective: Students will learn the introduction of Physical Education, the Concept of fitness and wellness, Weight management and the lifestyle of an individual. The student will also learn about the relationship of Yoga with mental health and value education. In this course, students will also learn about the aspects of the Traditional games of India.

Module No.	Content
	1. Physical Education: Meaning, Aim, Need, Importance and Scope of Physical Education in the Modern Society. Physical Education in India before and after Independence. 2. Concept of Fitness and Wellness: Meaning, Importance, and Factors affecting Fitness and Wellness. Components and fitness equipment. 3. Weight Management: Meaning, Factor affecting weight management. BMI: (Body mass index) Meaning, charts, range and category. Obesity: Meaning, Causes and its types, Solutions for Overcoming Obesity. 4. Lifestyle: Meaning, Definition, Importance, Factor affecting Lifestyle. Healthy Lifestyle through Diet. Relationship between Diet and Fitness. 5. Yoga and Meditation: Definition, importance of Yoga. Yoga relation with mental health and sports. Definition of Asana and Pranayama, differences between Asana and physical exercise. Asana-Suraya- Namaskar, Bhujang Asana, Naukasana, Halasana,Vajrasana, Padmasana, Shavasana, Makrasana, Dhanurasana, TadAsana. Pranayam - Anulom, Vilom, Bhramary. 6. Traditional Games of India: Meaning, types and benefits of Traditional Games. 7. Recreation in Physical Education: Meaning, Importance, and Benefits of Recreation. Types of Recreational Activities, Aerobics and Zumba (Fit India Movement).

Chapter No- 1

PHYSICAL EDUCATION

1. Meaning
2. Aim
3. Need
4. Importance and scope of physical education in the modern society
5. Physical education in India before and after independence

1. Meaning

Physical Education is an education which brings improvement in human performance with the help of physical activities. Physical activities range from simple walking to jogging, running, sprinting, hopping, jumping, climbing, throwing, pushing, pulling, kicking, etc. Education without physical activities is like body without soul. There is no controversy in giving due place to physical education and different forms of exercises in the total set-up of education. All teachings in human education begin with physical education. Physical education is also considered as movement education as the life begins from movement only. In general life is characterised by movement. The movement starts from the birth of a child, till the end of life.

Mental, intellectual, emotional and social development of a growing child is dependent and closely related to physical development. A physically fit individual possesses a well-balanced personality which is, mentally sharp, emotionally stable and socially well-adjusted.

Physical education teaches how to acquire ability to develop strength, speed, and endurance and coordination abilities. It also emphasises on achieving social qualities, such as, empathy, cooperation, friendliness, team spirit, and respect for rules, which are essential for healthy social relations with others. In this era of technological advancement, physical education and sports are considered essential for health, fitness, wellness, vigour and strength.

The concept of physical education is not new. The fact is that it has its roots in the ancient period. At various stages in history, different people have associated different meanings to the word 'Physical Education'. Physical Education in simple words is understood as learning

with the help of movements of body and realising the benefits at mental level. It simply means education through the use of physique and physical movements and deriving the advantage for social gain. Some of the definitions given by well known authors are given here to understand and for the ready reference of the students.

Definitions of Physical Education

According to the Ministry of Education and National Planning for Physical Education and Recreation, “The aim of physical education must be to make every child physically, mentally and emotionally fit and also to develop in him personal and social qualities that will help to live happily with others. Physical education programme should also aim to build good citizens of the country.”

According to the Central Advisory Board of Physical Education and Recreation, “Physical education is the process of education through physical activities. It is the development of the total personality of the child to its fullness and perfection in body, mind and spirit.”

2. Aims and Objectives

If you are doing physical exercises or playing any game regularly, you must have realised their importance. The aim of physical education is to target the total development of human personality. In physical education, the final aim is to make every human being physically, mentally and emotionally fit and also to provide each kind of opportunity to them, so that they can develop such personal and social qualities which will help them to live happily with others and shape themselves as true citizens of the country.

Efforts are needed to provide adequate facilities and ample time for the individuals and the groups to participate in situations that are physically wholesome, mentally stimulating and socially sound. Through physical education one can strive to achieve the following aims and objectives.

a. Motor Development

The objective of motor development refers to the neuromuscular relationship of nerve or nerve fibre to the one that connects the central nervous system with muscles. This in turn enables the movement of the body. To enhance the ability of the body to act, react and interact, it is necessary to exercise the muscles and nerves. In other words, physical development of a person is the foremost objective of physical education. Physical education is related to physical activities, which when performed, have an effect on various organ

systems of our body. It leads to the improvement in size, shape, efficiency, etc., of various organs of these systems. An individual who is having good motor movements may perform daily routine work very effectively without undue fatigue and laziness and feels confident in life. It also promotes sound health which enables an individual to become a valuable asset for the society and nation.

Motor development can be possible through participating in different kinds of physical activity programmes like, games, sports, yoga, dance, etc.

b. Mental Development

Mental development refers to the ability to think and solve problems effectively. Knowledge received by participating in physical activities about body movement, health, fitness, sanitation, nutrition, disease prevention and others may contribute to an individual's mental development. A mentally developed person takes wise decisions at the right time and in a right spirit. Mental development objectives deal with a person's ability to think correctly, act wisely and skilfully in all situations of life. Various activities conducted in physical education classes not only require physical strength but also need mental alertness, deep concentration, and precise movements. In this manner, physical education also sharpens the mind and makes it more efficient.

c. Emotional Development

This refers to a psychological situation of body and mind. Emotion is a drive to do something. Emotion covers experiences, such as, fear, anger, joy, love, sorrow, etc. It is usually a feeling which has specially become intense. For example, joy means intense pleasure. A child needs to develop confidence, a feeling of belongingness, and eliminate negative feelings through participating in games, sports, yoga, etc.

d. Social Development

This objective of physical education refers to the feeling of belongingness, adjustment of group living, social poise, social relationships, and social adjustment. Physical activities provide such opportunities to the children to fulfil basic needs like recognition, self-respect, belongingness, and love. When these needs are fulfilled, the individual becomes a well-adjusted social person. While participating in physical activities including games and sports, an individual acquires social qualities, such as, cooperation, friendship, courtesy, empathy, team spirit, democratic living, sportsperson ship, etc. These qualities are essential for social development.

e. Moral Development

Every game has a set of rules and regulations and it is the duty of each player to obey them. The players know that disobedience of any rule is a moral crime that can result in their expulsion from the team. Therefore, obedience of these rules becomes the moral duty of each player. Participation in games helps in moral development and equips them to differentiate between right and wrong with honesty. Hence, physical education also plays an important role in the moral development of a person.

3. Need and Importance of Physical Education in the Modern Society

The modern researches have proven that the views of Greek philosophers Aristotle and Socrates in considering athletics as complete education is correct. It has been scientifically observed that adequate exercise of limbs is essential for disciplining one's mind in the right spirit. Regular exercises and playing games help the body and mind to deal with the modern day silent killers, such as, stress, strain, worry, anxiety and tension. The need and importance of physical education may be understood in several ways which describes the different kinds of requirements for various sections of the society.

The need and importance of physical education for every section of people in the modern society can be understood from the points given below

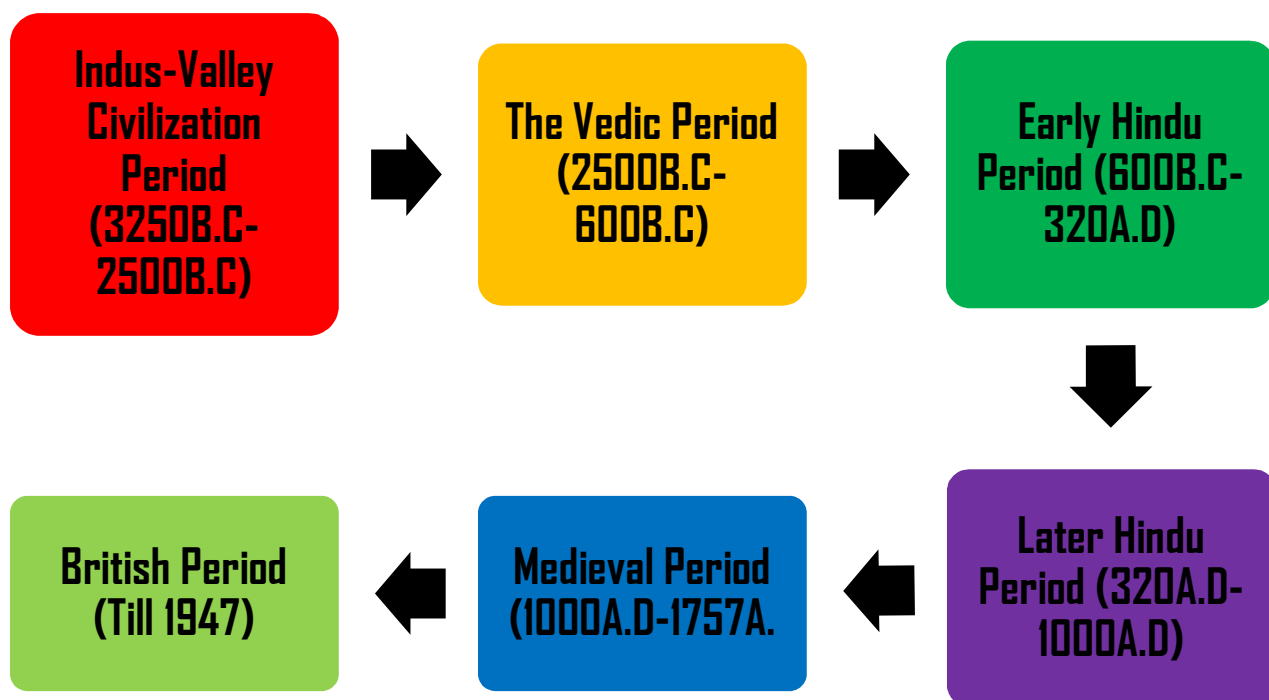

- Optimum development of child's physical growth
- Intellectual development
- Emotional development
- Social development
- Personal development
- Character building
- Physical fitness
- Development as a disciplined citizen of the country
- Neuromuscular development
- Cultural development
- Developing leadership qualities
- Healthy and safe environment
- Development of national integration
- Better international understanding

Sports and games play an important role in the development of human personality. They are no less important than food and fresh water. It is interesting to note that there are many nurseries and training centres for games in most of the developed countries.

4. Physical education in India before and after independence

The briefs of Physical Education today rest on the history of this field of endeavour. It is the source of Physical education's identity. Many of today's activities have their fore-runners in history. For instance, the first Olympic dates back to 776 B.C in Ancient Greek, yoga and Karate, activities with much recent interest, dates back to ancient oriental societies. Many more facts that will help the physical educators to understand the present better can be achieved by studying the past.

- ***DIVISION OF ANCIENT PERIOD WITH PHYSICAL EDUCATION EVIDENCES***

DEVELOPMENT OF PHYSICAL EDUCATION IN INDIA (PRE-INDEPENDENCE)

1. INDUS VALLEY CIVILIZATION PERIOD (3250 B.C-2500B.C):

There is no record of any physical art or craft during this period. But an idea of physical education can be carefully studied by studying the war, weapons, tools and implements, seals sculpture found at Harappa and Mohenjo-Daro. During this age the objective of physical education

was achieved through a daily routine of work, game, sports and amusements. Marbles, balls and dice were used for games. Boxing was also in practice as evident from a seal found.

2. VEDIC PERIOD (2500B.C-600B.C):

In this period the origin of Suryanamaskara was evidenced and it was performed as a religious duty, in today's time it's a physical exercise. Now, it has developed into a popular exercise. The practice of pranayama was another important development that occurs in this period. In Vedic period military training was developed and practiced. Along with military training martial skills, hand wrestling, use of bows and arrows, dagger fight, sword fight, mace fight, hurling the discus, horse riding, chariot racing, hunting, elephant riding, boxing were evidenced. In this period ball games were played by both man and women. Practice of yoga was for the development of spiritual development.

3. EARLY HINDU PERIOD (600B.C-320A.D):

Ramayana and Mahabharata make great deals of reference of physical training. Hunting was very much popular which was considered as a royal game. Dicing and chess were very popular games. Animal combat fight, wrestling, male fighting, chariot driving, archery and water sports were evidenced in this period. The practice of fighting with animals was prevalent and was considered to be important features of this age.

4. LATER HINDU PERIOD (320A.D-1000A.D):

In later Hindu period great universities like- Taksila and Nalanda were developed. Through these universities the idea of physical, intellectual and aesthetic training was the centre of learning. Wrestling, archery and mountain climbing were given special attention. At Nalanda University swimming, breathing exercise and yoga were the essential part of students learning. In this period, Gupta rulers give emphasis on importance of physical education. Hunting was very much popular and cock fight was very much popular. Elephant and buffalo fighting were popular. But in Nalanda university swimming hour were there for every student. Great emphasis were given on sound health and physical fitness along with habits, regulate diet, long walking, physical labour etc.

5. MEDIEVAL PERIOD (1000A.D-1757A.D):

In the 12th century A.D our physical education system was promoted in the gurukulas by our ancient teachers in the gymnasium. During 1200 to 1525 A.D kings paid more attention towards the military training which results in practiced of handling different kinds of weapons for self defence. The famous religious prophet like **Shree Samarth Ramadas Swamee** felt the importance of

physical education and he started practicing 1200 times Suryanamaskara every day. He started inspiring people to develop gymnasium with a temple of God Hanuman. Due to him only hundreds of gymnasiums were build in the country. That's why he is known as the father of Indian Gymnasium Movement. He introduced some physical activities inside the gymnasium such as- Suryanamaskara, Dands, Heavy Club Swinging, Malkhams, Wrestling, Swords fighting etc.

6. BRITISH PERIOD (TILL 1946):

- Before independence the evidence of physical education is nowhere, but some where it was evidenced.
- Before independence physical education was the part of our society but not the part of school curriculum. In 1870 it is evidenced that British Govt. has started including physical education in the school curriculum in their different regions.
- In 1882 Indian education commissioner has stated that physical education has its importance in each and every youth's life. In the year 1882 in each and every schools and institutions sorts, physical training, gymnastic, drill were in the school curriculum.
- In 1885 when congress party came into power they give emphasis on physical education to make the youth generation strong to fight against the British rule. This idea helps the youth generation to promote physical activities such as- wand fight, swords fighting, wrestling, dand-bethak (push ups) etc. In the year Akharas were established, yoga centers etc.
- In 1894 a proposal was send to include physical education in school curriculum but it was rejected. In the beginning of 1894 British introduced Swedish gymnastic in India in all schools but it was not allowed for the poor peoples.
- In 1903 in all school along with Swedish gymnastic, Indian sports started such as- football, kho-kho, Kabaddi, hockey etc. In 1903 British Govt. has stated promoting physical education in different parts of India. British Govt. has started physical education which is a commendable. In Saint Joseph School Swedish Gymnastic and other Indian sports are included in school curriculum.
- In 1920 govt. schools and Institutions has stated including physical education curriculum along with their school curriculum. At that there was a shortage of well qualified teacher's and to full fill up that Govt. has started establishing Colleges and Universities in which Y.M.C.A Institute of Physical education was commendable, Hyderabad Physical Education College, West Bengal Banipur Physical Education College, Lucknow Christian Physical Education College, in Bombay Kandivalli Training Institute of Physical Education, and in Amravati Sri Hanuman Vyam Prasarak Mandal were established.

- In 1923 Indian Olympic Committee was established.
- In 1925 Indian Hockey Federation was established.
- In 1926 Indian Cricket Control Board was established.
- In 1927 Indian Olympic Association was established. From 1934 Ranji Trophy started.
- In 1940 Indian Billiards Association was established. In 1940 Indian Swimming Federation was established.
- In 1944 Indian Amateur Athletic Federation Was established.
- In 1946 Amravati Sri Hanuman Vyam Prasarak Mandal and Akhil Maharashtra Physical Education Mandal combinely organised a Physical Education Open conference.
- In this open physical education conference Indian recognized associations were involved because these associations were responsible for the development of Physical education in India during that time. Due to this Physical education clubs, Gym, Akharas were developed and Physical education movement was started by aiming to make the India free from British rule.

DEVELOPMENT OF PHYSICAL EDUCATION IN INDIA (POST-INDEPENDENCE)

- In the year 1946 development of Physical Education was evidence in compare to the developed countries. But in this year 1946 the aims and objectives of Physical Education were just written only no action was done on those aims and objectives.
- In 1948 Central Govt. of India established a committee of Physical Education which was named as Tarachad committee. From 1948 Govt. physical education colleges has been established in each and every states of India for fulfilment of required teachers. One year diploma course has been started.
- In 1953 coaching scheme has been started which was initiated by Rajkumari Amrit Kaur. The coaching scheme was named after Rajkumari Kaur and the name of the coaching scheme was Rajkumari Coaching Scheme.
- In 1954 Indian Govt. established a curriculum advisory board whose function was to help the Indian Govt. in making a physical education curriculum. In 1954 Indian Sports Council was made. Its function was to communicate with the central govt. in favour of sports federations and associations. Under this council each and every state and district sports council was made and they have to function according to it.

- In 1954 under the guidance of **J. K. Bhosle** National Defence Scheme was constructed, its aim was to control the overcrowded refugee's after the participation happens. In this year Indian School Games Federation was established in Kolkata to conduct Inter-state competition among the school students. In 1954 Indian Cricket Council was established.
- In 1956 emphasis were laid upon Physical education curriculum and after that physical education curriculum was made.
- In 1957 on the name queen Jhansi, Laxmibai National Institute of Physical Education was established. Under this institute first time 3 years physical education course was started.
- For physical education development, sports development and for motivating youth generation toward physical fitness and activities Indian Govt. has opened a different section of Education departments in 1958. In 1958 Central Govt. along with different physical education committees has started discussing on the possible ways of including physical education in every schools and colleges.
- In 1959 Indian Govt. has created Ad Hoc committee whose function is to visit different schools and institutions and to advise to include more sports and physical activities.
- In 1961 **NIS (National Institute of Sports)** was established, under this institution specialization in one specific game has started to make the sports person well equipped knowledgeable in one particular game. Later, **NIS Centre was established** in Delhi, Kolkata, and Bengaluru. In 1962 Indian Govt. has educational handbook.
- In 1963 Kalyani University, Punjab University in Chandigarh, Banaras Hindu University in Uttar Pradesh has started Physical Education Curriculum along with Physical Education courses.
- In 1964 **University Grant Commission (UGC)** has published committee report, in this report it is mentioned that overall development of human beings and education, importance should be given to physical education in college and university level. In between 1964-66 Kothari Commission was established and through Kothari Commission a proposal was submitted to include Physical Education in school level.

- In 1974 West Bengal started physical education as a part of school curriculum and also as a subject up to secondary level.
- In 1975-95 in demand of physical education specially West Bengal has started establishing Teachers' training institutes' such as- **In 1975 State Institute of Physical Education for Womens' were established in Kolkata; In 1975 Jadavpur University Department of Physical Education were established; In 1975 Union Christian Training College and Baharampur Department of Physical Education were established; In 1978 Nikhil Banga Teachers' Training College Bishnupur.**
- In 1982 B.P.Ed course started in **Kalyani University West Bengal.**
- In 1983 **Government College of Physical Education for Women's' Hugli** were established.
- In 1994 Physical Education as subject started in **Banipur University and Jadavpur University.**
- From 1995 B.P.Ed course in physical education started in **Department of Physical Education Kapgari Seva Bharati Vidyalaya, Panskura Banamali College, Garhbeta College, and Mugberia Gangadhar College.** From 1995 physical education became the part of education system as an elective subject in colleges and universities.
- From 1999 three (3) years degree course in physical education were started in Visva-Bharati University.
