

BEDO0001: PHYSICAL EDUCATION & YOGA

Objective: Students will learn the introduction of Physical Education, the Concept of fitness and wellness, Weight management and the lifestyle of an individual. The student will also learn about the relationship of Yoga with mental health and value education. In this course, students will also learn about the aspects of the Traditional games of India.

Module No.	Content
	1. Physical Education: Meaning, Aim, Need, Importance and Scope of Physical Education in the Modern Society. Physical Education in India before and after Independence. 2. Concept of Fitness and Wellness: Meaning, Importance, and Factors affecting Fitness and Wellness. Components and fitness equipment. 3. Weight Management: Meaning, Factor affecting weight management. BMI: (Body mass index) Meaning, charts, range and category. Obesity: Meaning, Causes and its types, Solutions for Overcoming Obesity. 4. Lifestyle: Meaning, Definition, Importance, Factor affecting Lifestyle. Healthy Lifestyle through Diet. Relationship between Diet and Fitness. 5. Yoga and Meditation: Definition, importance of Yoga. Yoga relation with mental health and sports. Definition of Asana and Pranayama, differences between Asana and physical exercise. Asana-Suraya- Namaskar, Bhujang Asana, Naukasana, Halasana,Vajrasana, Padmasana, Shavasana, Makrasana, Dhanurasana, TadAsana. Pranayam - Anulom, Vilom, Bhramary. 6. Traditional Games of India: Meaning, types and benefits of Traditional Games. 7. Recreation in Physical Education: Meaning, Importance, and Benefits of Recreation. Types of Recreational Activities, Aerobics and Zumba (Fit India Movement).

Chapter NO - 7

Recreation in Physical Education

1. Meaning of Recreation
2. Importance and Benefits of Recreation
3. Types of Recreational Activities
4. Aerobics and Zumba (Fit India Movement)

1. Meaning of Recreation

As Dr. John H. Finely has pointed out, that the word recreation is broad enough to include 'play' in its every expression and also many activities that are usually not thought of as play - music, the drama, the craft, every free activity and specially creative activity for the enrichment of life”

Definitions of Recreation

“An activity voluntarily engaged in during leisure time and primarily motivated by the satisfaction of pleasure derived from it”

Meyer and Brightbill

2. Importance and Benefits of Recreation

There are certain fundamental human needs which are required to be satisfied; there are objectives of education that need to be achieved; there are obligations of democratic society that need to be fulfilled; there is price of the technological advancement relished by the modern society that has to be paid; and there are factors/changes which have given rise to the wide spread recognition of the need and importance of recreation in the modern life. In the explanation given below an attempt is made to point out why and how recreation is serving increasingly important functions in the life of the individuals, the community and the nation:

1. Recreation- A fundamental human need

Among all the peoples and in all stages of history, man has found outlets for self-expression and personal development in forms of recreation which have a striking similarity. Recreation is a common heritage of all people, although its expression takes varied forms. In

all lands, play is the chief occupation of young child during his active hours. Through play the child attains growth and experience. It is nature's way of affording outlets to the great biological urge for activity and the means of acquiring skills needed in later life. As he grows older, other forms of activity make increasing demands on his time, energy and attention. In adult life the duties and responsibilities of earning a living, earning for family and maintaining a place in human society tend to relegate recreation to a place of minor significance on the margin of life. Yet the urge for recreation is so fundamental and universal that it cannot be suppressed.

2. Recreation contributes to human happiness

Happiness was recognized by our forefathers as a fundamental and worthy objective for every individual. In fact life would be incomplete and drab without recreation, the great leader of recreation Dr. Austin Fox Riggs has rightly expressed that "The function of play is to balance life in relation to work, to afford a refreshing contrast to responsibility and routine, to keep alive the spirit of adventure and that sense of proportion which prevents taking oneself and one's job too seriously and thus to prevent the death of youth, and not infrequently the premature death of the man himself." Among the needs for real living there should be a beauty, knowledge and ideals; books, pictures and music; song, dance and games; travel, adventure and romance, friends, championships, and the exchange of minds. Recreation holds its place of importance in modern life because it has afforded and continues to afford opportunities for the attainment of these basic human needs which provide happiness.

3. Recreation and Health

Recreation is vigour's, and is carried in the open air, which makes use of the fundamental muscles and is the best known means of developing and maintaining healthy organs. Certain forms of recreation cause increased circulation, greater respiratory activity, better elimination of wastes and improved digestion. It contributes to emotional stability by affording rest, relaxation and creative activity. Also give tone to the body by a healthful stimulation of the nerve centers. The value of recreation has been characterized as an insurance policy against nervous disorders, which when collected in middle age, will reimburse hundred fold. Its contribution lies in its value in preventing illness by contributing to healthful, happy living. Recreation is also used increasingly in the mental rehabilitation of the individuals. People suffering from mental disorders have been found to react quickly to the stimulus of play, music in particular.

4. Recreation and character development

Recreation has been characterized as a force of tremendous consequence for the personal character and the national culture. Yet character development is not an objective specifically sought by persons engaging in recreation activities, it can be a natural by-product of participation in team games, drama, and music which require cooperation, loyalty and team play. Under recreation leaders of integrity and ability, people can be taught respect for rules, fair play, courage, an ability to subordinate the selfish interests of the individual to the welfare of the group and a capacity for team play. They also can be given valuable leadership experience. Recreation not only develops individual qualities, but it strongly influences the growth of social attitudes which affects the individual as member of group.

5. Recreation and Safety

Adequate provision for recreation, especially in the form of play grounds/swimming pools under the supervision of efficient leadership contributes definitely to the reduction of accidents. Recreation areas that are properly designed and carefully operated are remarkably safe. Recreation departments also contribute public safety by providing and supervising recreation areas by teaching skills that are essential to safe participation in injury prone recreation activities, and by enforcing safety regulations on public recreation areas. In the absence of safe recreation areas there is no safety in street recreation at a crowded place which may cause injuries.

6. Recreation and Democracy

Democracy and recreation are alike in spirit and each tends to promote and strengthen the other. Democracy is committed to giving each individual the opportunity to grow fully, express himself freely and achieve an abundant life. Recreation which represents activity freely chosen, offers the individual opportunity for genuine satisfaction, creative expression, and the development of his powers, helps him in attaining the objectives of democracy. It contributes to his effectiveness as a citizen in the modern democratic state.

And others importance

- Recreation and Crime Prevention
- Recreation and Community Solidarity
- Recreation and Moral
- Recreation and Safety
- Recreation and Democracy
- Recreation and Educational
- Recreation and Economy

3. Types of Recreational Activities

1. **Physical activities** these include games, sports, physical exercises, drill, marching, gymnastics, acrobatics etc.
2. **Mental and intellectual activities** these include discussion groups, study circles, debates, recitation, reading, writing, painting, modelling, chess, cards, etc.
3. **Self-defence and self-discipline activities** these include NCC, NSS, Territorial Army, home guards, sewa smites, Girl Guide and scouting, etc.
4. **Cultural and social activities** these include drama, music, variety programme, dancing, community service, first aid and celebration of religious, social and national festivals etc. For rural people of Haryana, Saangs (folk plays) Ragnis (folk songs), and rural games like kabaddi, volleyball and wrestling, etc. are best recreational activities, besides the T. V. & Radio programmes.
5. **Art and craft activities** these include drawing, painting, carpentry, modeling, spinning and weaving, gardening tailoring, doll making, needle-work, embroidery, paper machine, leatherwork, etc.
6. **Outdoor activities** these include outing, sight-seeing, visits, excursions, camping, hiking, mountaineering, etc.
7. **Hobbies** these include stamp collecting, newspaper cutting, photography, picture collecting, album making, picnics, specimen collecting, etc.

4. Aerobics and Zumba (Fit India Movement)

Inactivity is reaching “crisis proportions” as the result of a highly technological society that makes it convenient to remain sedentary. It is now estimated that 60 percent of adult Americans are not physically active on a regular basis. Even more disturbing, one in four Americans is not active at all. Recent findings confirm that fitness is a better predictor of health and longevity than almost any other factor studied.

Definition

Aerobic simply means in the presence of oxygen. Aerobic refers to those types of exercises that require oxygen to burn fat stores for energy. Aerobic exercise uses the same large muscle groups, rhythmically, for a period of 15 to 20 minutes or longer while maintaining 60-80% of your maximum heart rate.

Examples

Think of aerobic activity as being longer in duration yet moderate in intensity. Aerobic activities include:

- Walking
- Biking
- Jogging
- Swimming
- Aerobic dance classes
- Cross-country skiing
- Cycling

Benefits of Aerobic Exercise

- Increased resistance to fatigue
- Extra energy and stamina
- Toned muscles and increased lean body mass
- Decreased tension and stress
- Improved quality of sleep
- Psychological benefits - exercise improves mood, reduces depression and anxiety.
- Social – exercise is fun and can be shared with friends and partners.
- Control of body fat - aerobic exercise in conjunction with strength training and a proper diet will reduce body fat.
- Decreased risk of diseases - hypertension, diabetes, osteoporosis (weight-bearing activities), various cancers, and heart disease.

Why is it Called Zumba?

Zumba is called such because of its similarity to the Cuban music genre rumba. Music is a big factor in these exercise classes, which the name brings to mind.

Zumba was officially founded in the United States in 2001 by Alberto “Beto” Perez, a Colombian dancer who started the fitness class in the '90s in his home country. Perez's “rags to riches” story could be considered serendipity-he was teaching an aerobics class at his local gym when he realized hed forgotten his usual music.

Types of Classes

Aqua Zumba: Perfect for those with lower-extremity injuries or needing low impact exercises.

Zumba Gold: This modified version of the standard Zumba class is geared to an older audience that wants the same fun music and flair as a traditional class but performed at a lower intensity.

Zumba Kids: Designed for kids between 7 to 11 years old, Zumba Kids modifies and breaks down traditional Zumba moves, then adds games and activities to the class to keep kids engaged and interested as they break a sweat.

Zumba Kids Jr.: Similar to Zumba Kids, Zumba Kids Jr. is modified for the 4- to the 6-year-old audience and is positioned even more as a “dance party” to help keep this age group on “task.”

Zumba Step: The same Latin-inspired dance choreography, but with the addition of an aerobic step to increase the intensity of the workout and add more leg-strengthening moves due to repeatedly stepping on and off the elevated surface.

Zumbini: This once-a-week, 45-minute class is designed for the littlest Zumba fans between 0 and 3 years old; the little ones and their caregivers meet to bond over music and engage in age-appropriate active play; think less “workout” and more “learning experience.” As strength training classes gained popularity over the past decade, pulling people into gym and choreographed strength classes, the Zumba brand worked on adding more strength options to its repertoire as well, including:

Strong by Zumba: A high-intensity bodyweight training workout with movements choreographed to the beat of the music; pushups, squats, burpees, and lunges are staples of this routine

Zumba Gold-Toning: Just like Zumba Toning, but at a lower intensity level designed for a somewhat older audience

Zumba in the Circuit: Designed as a circuit, alternating between Zumba dance moves and strength training exercises for a full-body workout intended to improve cardiovascular fitness and muscular strength

Zumba Sentao: Uses a chair as a “dance partner” to focus on core strength without using weights.

Zumba Toning: Incorporates the use of Zumba Toning Sticks (or light weights) to add an element of strength training to familiar Zumba dance moves

➤ **Benefits**

Accessibility- Due to the program's widespread availability and the varied class style, Zumba as a brand is quite flexible and suited to almost all fitness levels and interests.

General Fitness - Given Zumbas sustained popularity, many studies have been performed on the efficacy of the workout. One 2016 review of the literature found that Zumba was effective

at improving aerobic capacity (cardiovascular fitness), while limited additional evidence pointed to possible enhancements to muscular fitness and flexibility.

Sustainability - One of the most critical factors in exercise is adherence-continuing the exercise program after you start. Generally speaking, the more enjoyable a program is, the more motivated you will be to continue it. And the more consistent you are with a program, the more likely you will experience positive results.

Energy and General Health - While almost any sustained workout program may help boost mood, self-esteem, and energy, Zumba has a few peer-reviewed studies pointing to its psychological benefits of the program.

➤ **Disadvantages**

Lacks Strengthens and Flexibility Components - The literature is clear that Zumba can provide cardiovascular benefits, but the jury is out on whether there are significant benefits to flexibility and strength. Unless you're taking Zumba classes, such as Strong by Zumba, those expressly incorporate strength-training moves as a primary component of the workout, you shouldn't view Zumba as a well-rounded general fitness class.

Safety Considerations - All fitness programs, regardless of type, carry an inherent risk. You could pull a muscle, twist an ankle, or fall. If you do too much too soon, you can risk excessive soreness or symptoms of overtraining.
