

(1) Standard dice : Only numbers are used here i.e. 1,2,3,4,5,6 and one more important property is opposite faces sum is 7, for example $1+6=7$ means 1 is opposite to 6 and so on .

(2) Ordinary Dice : Here numbers, letters colours and symbols can be used. Also if the sum the adjacent numbers is 7 then the dice is called Ordinary Dice

Q.1: Two positions of dice are shown. What will appear on the opposite to the face containing 5?

(A) 3

(B) 2

(C) 1

(D) 4

Q.2: Two positions of dice are shown. What will appear on the opposite to the face containing 3?

(A) 3

(B) 2

(C) 1

(D) 4

Q.3: Two positions of dice are shown. What will appear on the opposite to the face containing * ?

(A) @

(B) %

(C) \$

(D) CND

Q.4: Two positions of dice are shown using A to F letters. What will appear on the opposite to the face containing B?

(A) F

(B) C

(C) E

(D) CND

Q.5: Two positions of dice are shown. What will appear on the opposite to the face containing Brown?

(A) Blue

(B) White

(C) Red

(D) Green

Q.6: Two positions of dice are shown. What will appear on the opposite to the face containing 4?

(A) 3

(B) 2

(C) 1

(D) 5

Q.7: Two positions of dice are shown. What will appear on the opposite to the face containing * ?

(A) @

(B) %

(C) \$

(D) CND

Q.8: Two positions of dice are shown. What will appear on the opposite to the face containing 6?

(A) 3

(B) 5

(C) 1

(D) 2

Q.9: Two positions of dice are shown. What will appear on the opposite to the face containing 6?

(A) 3

(B) 5

(C) 1

(D) 2

Q.10: Three positions of dice are shown. What will appear on the opposite to the face containing 2?

(A) 3

(B) 5

(C) 1

(D) 6

Q.11: Three positions of dice are shown. What will appear on the opposite to the face containing O?

- (A) # (B) +
(C) % (D) &

Q.12: Three positions of dice are shown. What will appear on the opposite to the face containing A?

(A) C

(B) D

(C) E

(D) B

Q.13: Four positions of dice are shown. What will appear on the opposite to the face containing O?

(A) *

(B) \$

(C) @

(D) +

Q.14: From the four positions of a dice given below, find the colour which is opposite to Violet ?

(A) Red

(B) Yellow

(C) Blue

(D) White

Q.15: The figure given on the left hand side in each of the following questions is folded to form a box. Choose from the alternatives (1), (2), (3) and (4) the boxes that is similar to the box formed.

(A) 1, 2 and 3 only

(B) 2 and 4 only

(C) 2 and 1 only

(D) only 4

1

2

3

4

Q.16: The figure given on the left hand side in each of the following questions is folded to form a box. Choose from the alternatives (1), (2), (3) and (4) the box can be formed.

(A) 2 and 3 only

(B) 1, 3 and 4 only

(C) 2 and 4 only

(D) 1 and 4 only

1

2

3

4

Q.17: The figure given on the left hand side in each of the following questions is folded to form a box. Choose from the alternatives (1), (2), (3) and (4) the box that can be formed.

(A) Only 2

(B) 2, 3 and 4

(C) Only 3

(D) 3 and 4 only

EXAMPLE

A cube of each side 4 cm, has been painted black, blue and red on pairs of opposite faces. It is then cut into small cubes of each side 1 cm.

The following questions and answers are based on the information give above –

Q.1. How many small cubes will be there ?

A. 64

B. 48

C. 16

D. 24

EXAMPLE

A cube of each side 4 cm, has been painted black, blue and red on pairs of opposite faces. It is then cut into small cubes of each side 1 cm.

The following questions and answers are based on the information give above –

Q.2. How many small cubes will have three faces painted ?

A. 54

B. 8

C. 16

D.24

Q.(3): All the faces of a cube are painted with blue colour. Then it is cut into 125 small equal cubes. How many small cubes will be formed having only one face coloured ?

A. 54

B. 8

C. 16

D. 24

Q.(4) All the faces of a cube are painted with blue colour. Then it is cut into 125 small equal cubes. How many small cubes will be formed having no face coloured?

A. 27

B. 8

C. 16

D. 2

Q.(5): All the opposite faces of a big cube are coloured with yellow, red and green colours. After that is cut into 216 small equal cubes. How many small cubes are there where one face is green and other one is either yellow or red ?

A. 16

B. 48

C. 32

D. 64

Q.(6): All the opposite faces of a big cube are coloured with yellow, red and green colours. After that is cut into 216 small equal cubes. How many small cubes are there whose no faces are coloured ?

A. 128

B. 32

C. 36

D. 64

Q.(7): All the opposite faces of a big cube are coloured with yellow, red and green colours. After that is cut into 216 small equal cubes. How many small cubes are there whose 2 faces are coloured ?

A. 128

B. 64

C. 16

D. 48

Q.(8): All the opposite faces of a big cube are coloured with yellow, red and green colours. After that is cut into 216 small equal cubes. How many small cubes are there whose only one face is coloured ?

A. 128

B. 64

C. 16

D. 96

Q.(9): All the opposite faces of a big cube are coloured with yellow, red and green colours. After that is cut into 216 small equal cubes. How many small cubes are there only green colour painted?

A. 96

B. 32

C. 28

D. 48
