

Assignment sheet

Air & Noise pollution Control (BCEE 0215)

BCA (All Section) 1st Year 1st Semester

1. What is the air pollution, Define their types and effects?
2. Define sedimentation and diffusion dispersion behavior?
3. Discuss about major pollutants?
4. What is the full form of CPCB, EIA, SPCB, and NAAQS?
5. Detailed description of any three significant air pollution tragedies?
6. Define the sources of particulate matters?
7. List out the categories of the particulate matters. Analyze the high volume sampler's key characteristics?
8. Describe the noise standard that the CPCB Recommends?
9. List out the various control devices that controlled and removed the particulates?
10. Gives the 10 examples of the different ways that noise pollution can be controlled?
11. List out the benefits, drawbacks, and commercial uses of gravitational settling chamber?
12. Describe how particulate matter damages the atmosphere?
13. List out various types of collection equipment for particulates. With neat sketch interpret the principle, construction and working of electrostatic precipitator?
14. Determine the size range of the particulate that cyclone separator can effectively remove. Explain the cyclone separators operating principle with a clean sketch ?
15. Define aerosols their types and effects of the aerosols
16. Gives the examples of the various types of the noise pollution
17. Define the origins and properties and effects on human health electrostatic precipitators, cyclone collector
18. List out the benefits, drawbacks, and commercial uses of gravitational settling chamber?
19. Discuss about the carbon monoxide, sulphur dioxide, nitrogen dioxide, voc
20. Define hydrocarbons and their advantages and disadvantages
21. Define the particle size and the particle size distribution?
22. Give the name of five types of primary pollutants and discuss about any two in detail
23. Define PAN, OZONE, SMOG
24. Effects of the noise pollution on human, on environment, on animals?
25. Explain the sources of the noise pollution and prevention of it?
