

Tutorial Sheet

- 1. What is importance of Indian tradition knowledge for the environment.**

Importance of Traditional Knowledge

- Traditional Knowledge plays a key role in the preservation and sustainability of diversity.
- Many activities based on traditional knowledge are important sources of income, food and healthcare for the indigenous people.
- The long term economic development of many indigenous and local communities, depend on their ability to harness their traditional knowledge for commercial benefits.
- Traditional Knowledge is being rapidly lost as local ecosystems are degraded and traditional communities are integrated into the wider society.

Ans:

- 1. What is human population density.**

Ans: Population density is the number of people per unit of area, usually transcribed as "per square kilometer" or square mile, and which may include or exclude, for example, areas of water or glaciers. Commonly this is calculated for a county, city, country, another territory or the entire world.

Or

See from PPT

- 2. Write the difference between crude and ecological density.**

Ans. The major difference between both are crude density includes the whole land that is within the organisms range whereas ecological density covers the area that can be colonized by the species.

Or

See from PPT

- 3. Write the effects of human population explosion.**

Ans: Population Explosion: Rapid increase in the population in an area consisting of human beings.

The effects of population explosion include:
