

Ecosystem

Q.1. Availability of energy is less for entities at higher trophic levels. Why?

Q.3. Can we address an aquarium as a complete ecosystem?

Q.6. Explain why the flow of energy at different levels in an ecosystem is unidirectional and non-cyclic.

Q.4. Explain how energy flow supports the second law of thermodynamics in an ecosystem.

Q.5. Answer the following questions. Write the outcomes of the following events.

- a) The consequence of eliminating all producers
- b) The consequence of eliminating all entities at the herbivore level
- c) The consequence of eliminating all top carnivore entities

Question 66.

Rajni was watching a programme on TV about the earth. The host was explaining how the increased cutting of trees and forests is affecting the ecosystem, its components and services, etc. She got curious and asked her teacher about 'what services the ecosystem provides to human beings?

- (i) How does ecosystem services benefit us?
- (ii) Name the value put forth by Robert Constanza and his colleagues on ecosystem services.
- (iii) What values are showed by Rajni?

Question 65.

Aryan worked on the farm with his father.

He saw that his father added earthworms to the soil. He came to his father and told him not to do so. His father explained why he was doing so and Aryan was satisfied with the explanation.

- (i) Why were earthworms added to the soil?
- (ii) What values do you observe in Aryan's father?

Question 64.

In a food chain, grass is consumed by goat which in turn is consumed by humans. Anant states that man is the secondary consumer in this food chain. Is Anant correct? If yes, give reason.

Question 56.

Discuss the role of healthy ecosystem services as a prerequisite for a wide range of economic, environmental and aesthetic goods and services. (Delhi 2017)

Question 44.

- (i) Explain the significance of ecological pyramids with the help of an example.
- (ii) Why are the pyramids referred to as upright or inverted? Explain. (All India 2012)

Question 42.

- (i) With suitable examples, explain the energy flow through different trophic levels. What does each bar in this pyramid represent?
- (ii) Write any two limitations of ecological pyramids. (Delhi 2014C)

Bio-diversity

Que: How is biodiversity measured?

Que. Why is biodiversity important to the planet?

Que. What are the main causes of biodiversity loss?

Que. Differentiate between species diversity and ecological diversity.

Que. State two ways through which humans are benefitted from biodiversity.

Que. How can the loss of biodiversity be prevented?
