

Economics Principles and Engineering

Assignment – 1

Assignment Title

Application of Demand and Supply: Understanding Market Behavior Through a Real-world product

- Each student will select one real product or service from the market (e.g., smartphones, milk, ola/uber, cinema tickets, laptops, cold drinks, etc.).
- Gather recent market information about the chosen product (such as price changes, demand trends, seasonal variations, supply issues, competitor behavior, input cost changes, and relevant news).
- Analyze the Demand Side:
Explain how income, consumer preferences, expectations, substitutes/complements have influenced the real-world demand for the product)
- Analyze the Supply Side:
Explain how supply factors (cost, technology, raw material, number of sellers etc) have affected supply of product.
- Conclusion

Prepare a hand written assignment about the above mentioned points for the product that you have selected, also use this assignment to draw connections between theoretical concepts of demand and supply and their practical side.

Upload and then submit in hardcopy on or before 21 November 2025.
