

Assignment 1 (Unit -I)

Food Nutrition and Hygiene: BCHO 0011

Total Mark: 30

Q1. Express your understanding of 'food', 'meal' and 'balanced diet' [3]

Q2. Suppose you are preparing diet charts for your family members. Analyse the factors that you think are going to influence a balanced diet chart. [3]

Q3. Outline the role of food in human physical, mental and social health. [3]

Q4. Complete the table utilising the concept of food groups. [3]

Food	Origin	Nutrients	Function
Gooseberry (amla)			
Paneer			
Soybean			
Pulses			
Fish			
Rock Salt			

Q5. There always exists confusion between 'nutrients and nutrition' due to their nearly similar pronunciation. Outline the differences between 'nutrients' and 'nutrition' with examples. [3]

Q6. Consider a heavy worker who needs 800 cal/day calories in addition to the BMR. The details of the worker are tabulated below. Calculate the total calories required by the worker in a day.[3]

Weight (kg)	Height (cm)	Age (year)
68	172	35

OR

Let us consider that Miss Jenny is a student. The details of her are tabulated below.

Weight	Height (cm)	Age
50 kg	5 feet 4 inches	19 years

Calculate the BMR for Miss Jenny in calories/day. [1 feet =30.48 cm]

Q7. Suppose you have been appointed as a field researcher for social work in an NGO. You have travelled to different parts of the country and researched the reasons behind malnutrition. Outline the factors that you think are associated with malnutrition in the country and explain your plan to reduce malnutrition. [5]

Q8. Appropriate nutrition is essential for human growth and development. Differentiate among optimum, under and overnutrition, and illustrate their impact on human health. [5]

Q9. Illustrate the function of food to protect from diseases. [2]
